

**2020 Virtual User Conference**

10.15.20 1:00 - 5:30 PM EST

# ***INTRODUCING PRIVIA WEB***

**Jay McConville**

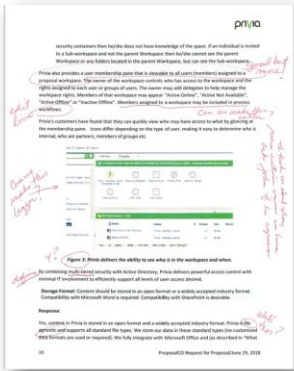

# Why Privia Web?

- Expand your collaborative community.
- Ease deployment of Privia capability.
- Improve Curated Commenting.
- Modernize Interface.
- Support macOS.
- Go Mobile!

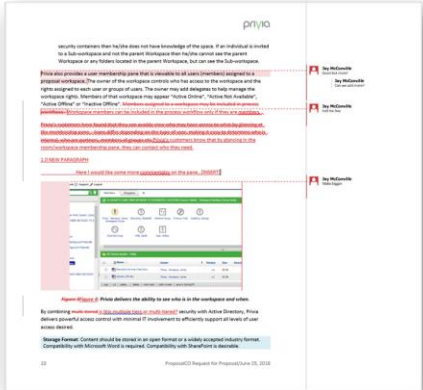

**Goal:  
Improve  
this Process**

**Proposal  
Manager**

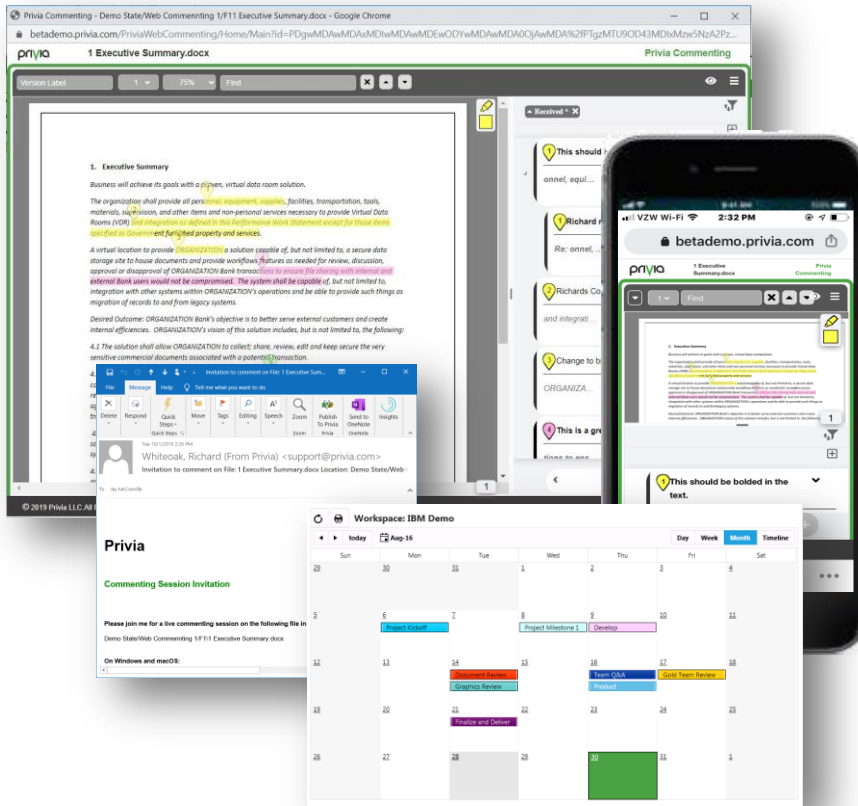

This is bad...

This is better, but not by much...

# No Downloads Required

- Multi-year effort to provide all the Privia user tools via a browser
- Eliminates the need for users to download software
- “Completed” effort with Web Commenting (Web Calendar was released with V5.13 in 2019)
- Client application still available, tools work seamlessly together
- We will continue to move more capabilities – including Admin capabilities – into the browser according to customer input and technology changes

*Privia Web makes it easier for Proposal Managers and staff to invite new contributors to the team.*
