

PRODUCTS & SOLUTIONS FOR THE INDOOR GROWER

Integrated Pest Management

Integrated Pest Management (IPM) is a proactive, holistic approach which promotes healthy crops. Utilizing our scientific and experience-based techniques, pests are kept below an economic threshold. Our best practices approach of creating SOP-style IPM programs for cultivators allows them to be proactive with a holistic approach that helps prevent and treat pest infestations.

IPM takes a low-toxicity approach to preserve the marketability of your crop via prevention, exclusion, treatment and monitoring. urban-gro provides a variety of products, services, and solutions to promote a higher yielding, cleaner, and safer end-product. More importantly, compliant solutions are now required by law. As the laws regulating acceptable solutions continue to change, our IPM services can ensure you stay compliant.

OUR PESTICIDES

Our comprehensive pest management package is holistic and individualized. We provide training and guarantee compliance.

BENEFICIAL INSECT CONTROLS

Beneficial insects are living predators and/or parasitoids used to control pests. Beneficials are most effective when introduced prior to a major infestation.

COMMERCIAL APPLICATORS

Using the right tools for the job is important. Our heavy-duty sprayers are made in America and built to withstand cultivation environments.

PROTECTING YOUR YIELDS

urban-gro's Crop Protection Program ensures compliance and helps cultivators realize maximum yields from one harvest to the next. The following demonstrates the annual investment relative to projected revenue for a 15,000 sq. ft. cultivation.

Canopy Square Feet: 15,000 sq. ft.
Projected Revenue: \$11M - \$15M/year*
% of Overall Revenue: ~.03%

*Based on urban-gro analysis and calculation.
