

Maximize your Okta implementation

- Uncover your shadow-IT.
- View SaaS usage and cost in one place.
- Gain full visibility to all SaaS apps, even those not connected to Okta.
- Optimize SaaS license usage, improve utilization, and close unused SaaS apps.
- Understand your Okta adoption and accelerate its implementation.

Torii is a SaaS management platform that automatically discovers all your organization's SaaS usage and costs.

New Okta customers

Faster Okta implementation - Torii gives instant visibility to all SaaS apps being used, giving IT the means to decide which SaaS applications to connect to Okta. No more shadow-IT, get everything connected to Okta.

Migrate away from a different SSO - Are you using a different SSO solution at the moment? Torii gives an instant view of what's currently connected to your existing SSO solution and helps you with the migration effort.

Existing Okta customers

Discover anomalies - Find users that are active on G-Suite/Azure-AD but don't have an account on Okta, and vice versa.

Improve SaaS security - Make sure new SaaS apps can be connected to Okta using SAML. Receive alerts from Torii every time someone starts to use a new SaaS application, giving IT the ability to identify whether the new app supports SAML before the org adopts it.

Connect on-premise apps to Okta - Torii also gives visibility to your on-premise web apps, helping you connect SAML-supported on-premise apps to Okta.

Save money - Get a unified view of the number of times employees use Okta to log in and to which services. Easily find unused licenses, helping IT save money.

Measure Okta adoption success - Track the number of total apps connected to Okta over time.

Gain full visibility of all SaaS being used, known and unknown. Start managing your SaaS.

All your SaaS applications. In one single place.

Torii lets you discover, optimize, and control your organization's SaaS usage and costs

Automatic Discovery

Discover all the SaaS applications being used in your organization to stay in control and avoid surprises.

Cost Optimization

Reduce costs by optimizing license usage, identifying redundant SaaS apps, and noticing unexpected spikes in fees.

User Usage Tracking

Track usage trends to identify abandoned apps and unused licenses across all your SaaS apps.

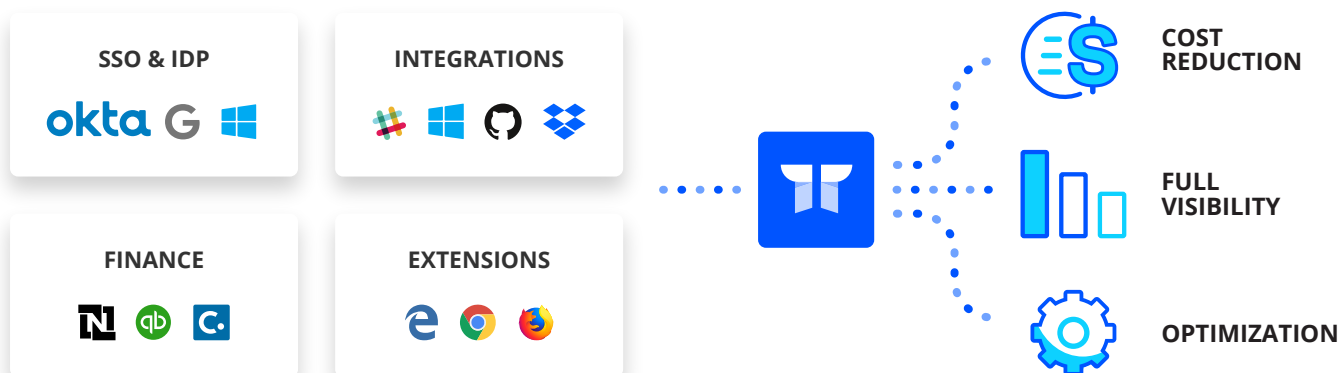

Smarter Renewal Decisions

Get advanced alerts about renewals with the data you need to make informed and accurate decisions.

Torii's unique technology is the only solution that discovers thousands of SaaS and on-premise applications, instantly without any configuration.
