BOOST YOUR BUSINESS CONNECTIVITY, WITH SD-WAN

SD-WAN gives you unprecedented visibility and control of network traffic, representing a significant growth opportunity for your business.

With Intercity Technology you get the best of both worlds when it comes to our network. Our Software Defined Network (SDN) prioritises automation, enabling faster service delivery and improved in-life management.

One of the key advantages of SD-WAN is that it is 'transport-agnostic', ensuring the network can utilise any transport mode, regardless of who provides it or where the network edges are located.

Our Software-Defined Wide Area Network (SD-WAN) solutions build upon these foundations, providing even greater visibility and control – all the way to individual users and applications. SD-WAN can help you to make the most of the network you have.

But it can't create more bandwidth. That's where Intercity's SDN comes in and completes the picture. Gain the quality, visibility and performance of SD-WAN and retain the bandwidth flexibility of our network.

Business Benefits

Visibility and control of your network in real-time – SD-WAN delivers complete visibility and control of your network traffic, ensuring that your business critical data is prioritised for top performance

Security – Security is inherent to the SD-WAN solution, delivering all of the benefits of a secure MPLS deployment with the visibility of traffic flows and an integrated security suite

Flexibility – Add or change bandwidth in near real-time

Ease of Use – Control traffic routing, application performance and security via an easy to use interface

UK based support – We offer full 24x7x365 UK based support with knowledgeable staff who can troubleshoot issues and offer advice on best practice for system configuration

Firewall – Next Generation Firewall (NGFW) as standard with all deployments.

SD-WAN Data Sheet

THE BENEFITS OF SD-WAN

SD-WAN allows you to control traffic routing, application performance and security via an easy to use interface.

High availability and scalable platform for rapid introduction of new service offerings.

Consistent and reliable WAN services that align with business objectives.

Built in end-to-end encryption ensures the security of your data both in-flight and in the Cloud.

Existing connectivity customers are able to be upgraded remotely, and in a project managed way.

Traffic management capabilities ensures business continuity.

About Intercity

Intercity is the ideal partner to enable organisations to flourish securely in the new age of working from anywhere.

With 35 years' experience, we have the skills and expertise to help your business today and prepare for the future.

Since 1985, we have been giving honest advice and providing technology-enabled solutions to over 4,000 customers internationally. Today, we are proud to have delivered innovative solutions to public and private businesses, large and small, across the globe.

We are one of the few businesses that can securely bridge the IT gap between home and corporate working. Our support brings together our expertise in communications, managed services and secure cloud to enable workforces to safely operate both remotely and under the same roof.
