Summary of experience

Ritesh has over 15 years of financial advisory and auditing experience including RSM, a major Canadian Bank and Big Four accounting firm. Ritesh assists clients in addressing technical accounting challenges including debt and equity financing transactions, current expected credit losses (CECL), compensation related transactions, financial asset impairment, business combination, fair value and revenue recognition considerations.

Prior to joining RSM, Ritesh was the head of accounting policy at a major Canadian bank where he ran the special projects along with policy implementation for the bank's U.S. segment. In this role, he led the implementation of CECL project for the bank's U.S. segment and also assisted lines of business on technical accounting matters with respect to financial asset impairment, business combination and revenue recognition serving as a primary liaison with the external auditors and executives at the bank.

Ritesh also has extensive experience as a Senior Manager at a Big Four accounting firm advising on complex debt and equity financing transactions, compensation related transactions, and fair valuation.
