

We are proud to support the World Land Trust

At COOLSPIRiT we understand that our business has a direct impact on the environment and so we're actively working towards best practices in the technology sector.

We're excited to have now partnered with the World Land Trust as a corporate supporter. The World Land Trust carries out essential reforestation projects, supporting conservation and creation of wildlife-rich habitat benefitting local communities, reconnecting forest areas, and storing carbon.

We will plant a tree for every order placed with us.

When you place an order with COOLSPIRiT our donation on your behalf pays for a sapling, the preparation of its plot, planting and most importantly, protection of this delicate young tree for the first 3-4 years to ensure it grows strong. If the tree dies then it will be replaced.

Find out more about the number of initiatives we have in place to work towards becoming carbon neutral.

About the Borneo Project

World Land Trust is working with partner HUTAN to restore native forest to 110 acres of land previously cleared for oil palm plantations in Sabah, Malaysian Borneo, adjoining the Keruak Corridor previously protected by World Land Trust.

World Land Trust is funding the planting of 20,000 trees and the project offers employment to a team of local women to plant the trees. This habitat is home to the Critically Endangered Bornean Orangutan, Proboscis Monkey, Pygmy Elephant and all 8 of Borneo's Hornbills.
