

# EXTEND THE VALUE OF HPE CLOUD VOLUMES BACKUP WITH COMMVAULT

## Why Commvault?

Commvault is part of the HPE Complete program, helping you with the convenience of one-stop shopping for tested and validated HPE and Commvault end-to-end solutions for data protection and data management across the entire HPE storage portfolio.

Commvault has the largest breadth and depth of coverage across the HPE server and storage portfolios than any vendor.

Commvault also has the largest ecosystem of supported enterprise applications, hypervisors, storage arrays, containers, and cloud storage providers.

Commvault was awarded the [2019 Technology Partner of the Year](#) and [2020 HPE Momentum Storage Partner of the Year](#) for storage solutions from HPE for tightly integrating its data protection and data management solutions across the HPE storage and server portfolios.

## Robust hybrid cloud elasticity, scale, and data portability. Enterprise-grade data management and data protection—wherever your data lives.

Commvault enhances and extends HPE Cloud Volumes Backup with:

- **Enhanced edge data protection:** Deep integration support for HPE Catalyst API enables automated edge-enabled data protection ideal for highly distributed data enterprises.
- **Purpose-built backup meets cloud scalability and elasticity:** Extend native HPE Cloud Volumes Backup capabilities to enable cloud-based instant recovery, DR on demand, and instant migration: VM to VM format, cloud to cloud, and to/from on-premises and back.
- **Comprehensive control of your data enterprise:** Commvault seamlessly provides natively integrated, award-winning data management across all your data—no matter where it lives—without the need for expensive gateways or connectors.
- **Industry-leading data coverage:** From containers to legacy and cloud-born applications, Commvault software ensures broad workload coverage wherever your data lives—including native integration to 40+ cloud options.

## ALIGN DATA PROTECTION TO CLOUD ECONOMICS AND CLOUD CONSUMPTION MODELS

Granular indexing and rapid recovery across both traditional and cloud-born applications means you'll be able to recover and restore the exact data you need, when you need it—regardless of where your data lives.

DR on demand and instant, rapid recovery with Commvault Live Sync and Live Mount deliver ultimate public cloud and VM format flexibility to HPE Cloud Volumes Backup—and beyond.

From edge to cloud, Commvault has your data covered and protected with a single platform.

## DATA PROTECTION BUILT WITH EDGE DATA IN MIND

Stress free edge data protection is here with Commvault on HPE Cloud Volumes Backup. Ideal for branch operations, remote locations without IT personnel (or without any personnel). Spin up storage capacity in the cloud in minutes and integrate seamlessly with existing data workflows.

Automation, AI, and Commvault's award-winning policy engine do all the work for you. Reliable, resilient, and scalable (up or down) as needed. Ultra-light MediaAgent install at remote locations gets you up and running in minutes. Commvault automation eliminates the need for on-site IT expertise.

**Solution brief**

**HPE Complete benefits**

- **Single HPE purchase order**—One-stop shop for both HPE and third-party branded products.
- **Build with confidence**—HPE Complete Assured validation of compatibility and interoperability.
- **Customer experience**—Simplified solution deployment with custom HPE integration guides and tools.
- **HPE Complete Assured**—HPE Complete Assured testing validates reliability and interoperability of partner products with HPE storage and server solutions and helps ensure solution concurrency over time.

**ACHIEVE GLOBAL DATA PORTABILITY ACROSS HYBRID CLOUD AND MULTICLOUD**

Commvault’s advanced integration support extends the value of HPE Cloud Volumes Backup as a powerful tool to accelerate your digital transformation.

**Adding Commvault enables you to**

- Achieve complete data portability with instant migration capability—seamlessly move your workloads within your overall hybrid cloud and multicloud environment.
- Eliminate data silos to reduce data sprawl and reduce the cost of your data resources.
- Gain visibility into all your data, regardless of where your data lives.
- Instantly restore your data across data centers, cloud, and the edge—when and where your data is needed.
- Commvault: Unmatched industry leadership.

- For over 20 years, Commvault has focused on helping organizations gain maximum value from their data.

**COMMVAULT’S CREDENTIALS**

For over 20 years, Commvault has focused on helping organizations gain maximum value from their data.

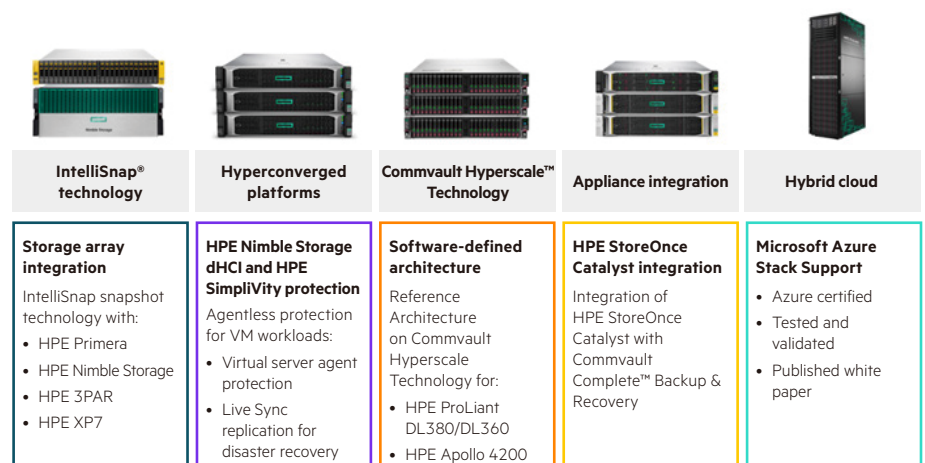

Commvault’s credentials:

- 8 years running: In the Leaders quadrant of Gartner’s 2019 Magic Quadrant for Data Center Backup and Recovery Solutions.
- A Leader in the Forrester Wave: Data Resiliency Solutions Q3 2019: Top-ranked in current offering, highest scores in numerous categories.
- Recognized by CRN Magazine as “One of the 100 Coolest Cloud Companies” of 2020.
