pivvot™
location with context.
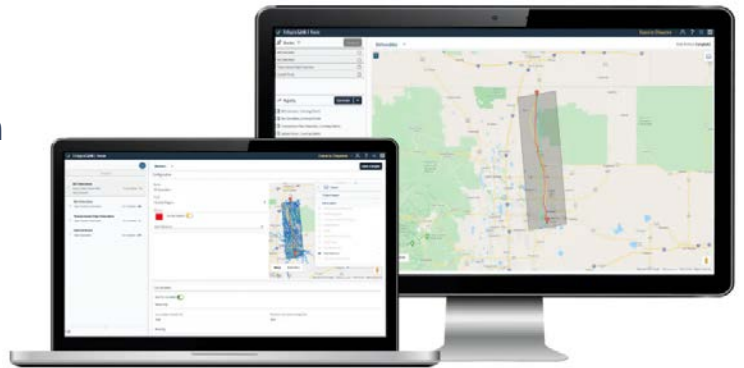

ENGINEERING & CONSTRUCTION SOLUTIONS

Streamline routing and site analysis, access high-quality data on-demand, and deliver better cost estimates with Pivvot's engineering and construction software.

WIN MORE PROFITABLE WORK

- Utilize Pivvot's engineering and construction software to identify and win more profitable projects.
- Produce more competitive FEL, FEED, permitting, and environmental estimates backed by up-to-date data and detailed analysis.
- Respond to RFP's faster with more accurate information including permitting needs, better cost estimates, and material supply lists.
- Evaluate multiple project site or route locations to determine a project's environmental footprint earlier in the process.
"We are dedicated to delivering quality, efficient, and innovative technical services and solutions to our clients. Pivvot's technology and its comprehensive approach to big data analytics reduces our design time and enhances project delivery, allowing us to provide transformational value and quality to our customers."

COLLABORATION TOOLS

- Engineering and construction firms can use the Pivvot platform to better collaborate with clients.
- Deliver project status, reports on progress, and manage changing client needs at any phase of projects.
- Easy to use software required little to no training.

PARCEL & ENVIRONMENTAL DATA ON DEMAND

- Pivvot has curated hundreds of data sources specifically for energy projects such as pipeline routing, electric transmission siting, solar siting, and more.
- We deliver parcel and other data directly to engineering companies to save time on manual data collection and deliver greater value to your clients.

ACCELERATE PROJECT SCHEDULES
Provide better quality site analysis in less time and reduce the need for field recon.

EXPAND YOUR SERVICES OFFERINGS
Develop a solution-driven approach to add or significantly improve your preliminary routing lines of business.

INCREASE EFFICIENCIES
Collaborate with clients to build or reroute assets with greater speed and transparency - saving everyone time and money.
