# Project

From the Strategy module, the organisation's strategy is cascaded into the Clearview Project module. The Project module enables you to manage your strategy, breaking it down into project plans and related tasks; ensuring the plan can be delivered effectively and efficiently.

The Project module links together all of the key elements of the planning process, including delivery of excellent outcomes, identifying efficiencies and value for money initiatives, and recording project budgets, enabling you to deliver a single integrated plan for your organisation.

"Staff (use 'Clearview' to) track the progress of the project they are working on and how it relates to wider corporate goals. Action plans are SMART and progress against the plans closely monitored. This improves the certainty that key projects will be delivered."

Strategy and performance suite

- Strategy
- Project
- Risk
- Service excellence
- Performance scorecard
- Personal performance
- Intelligence and reporting

The Project module enables you to:

- Link your corporate objectives to the day-to-day activities of your staff, building and maintaining the organisation's golden thread;
- Ensure visibility and reporting of organisational achievements;
- Streamline project management, reducing the time and effort involved in project planning;
- Ensure that plans are properly assessed and resourced by tracking progress of all your employees to identify over-commitment and timing issues;
- Evidence project progress and outcomes by linking to documents stored electronically; providing a vital evidential tool;
- Eliminate duplication of effort across the business;
- Easily allow people to update tasks and add comments on progress;
- Show project-by-project progress in a Gantt chart to give instant appreciation of project delivery issues and conflicts at an early stage;
- Generate email alerts to support your processes such as flagging where a project or task is overdue;
- Deliver continuous improvement by linking to excellence frameworks and quality standards such as Investors in People and Customer Service Excellence;
- Drive annual efficiencies and value for money initiatives from your projects and plans; and
- Develop project budgets and cascade them into your annual budget process.
