

Creating Sustainable Collaborative Networks

Remove the distance and collaborate effortlessly by bringing the expertise of all your teams together, turning great ideas into meaningful improvement.

✓ Search and Discover

Advanced filters allow you to access and discover information across your collaborative or organization.

✓ Direct Communication

Don't wait to be introduced, get direct access to the Life QI directory and spark up a discussion with like-minded people.

✓ Remove the Admin

No more manual data submission required. Get access to the right data, in the right format, every time.

✓ Remove Boundaries

Life QI removes barriers and helps collaboratives disseminate lessons learned, which in turn helps accelerate local and national change.

✓ Transparency

View, learn and accelerate with the 'Everyone can View' functionality. Let others learn from your successes.

✓ Scalable Structure

Grow with ease. Flexible dashboards and custom report templates dynamically update as new organizations, projects and programmes are added.

Aggregate Data

The power of aggregation is often underestimated. Life QI has revolutionized the way data is collected, exchanged and applied.

Bring all of your hospital data together and create a single unified data asset. Once data is aggregated, problem areas can be identified and understood leading to better decision-making, improved outcomes and reduction in costs.

Multi-site Reporting

Reporting can be a laborious task and difficult to keep on top of. Life QI assists with custom report templates to encourage consistent practice across your collaboratives.

Single Sign-on (SSO)

Increase productivity and expedite onboarding by integrating your Single Sign-on (SSO) solution with Life QI.

Bulk Invites

Invite any number of people at once and monitor their steps through sign-up.

Collaborative Programmes

Work with any number of organizations at any number of locations.

Reduce Collaboration Cost

Collaborative working doesn't have to be a costly affair. Life QI helps large-scale collaborations successfully work on improvement projects remotely, driving down travel costs.

Set Permissions

Restrict access to sensitive information or share public work with everyone, everywhere.

Reduction in Variation

Everyone working in the same way and producing the same data presents a clear, streamlined reporting plan that is easy for multiple organizations to follow.
