

Your Improvement Portfolio

Healthcare organizations that embrace quality improvement are seeking better outcomes for patients, increases in productivity and efficiency and reduction in costs. Achieving and sustaining this at any scale requires purpose-built tools, accurate data and a culture of collaboration and sharing.

✓ Track Everything

Record every project ever started and track it throughout its journey. Never miss a project or an update.

✓ Identify Problems

Don't let projects stall, identify and support your team every step of the way, remove problem areas fast so projects can thrive.

✓ Multiply the Impact

Maximize the return of successful projects by easily spreading the improvement across the organization to scale up the results.

✓ Celebrate Success

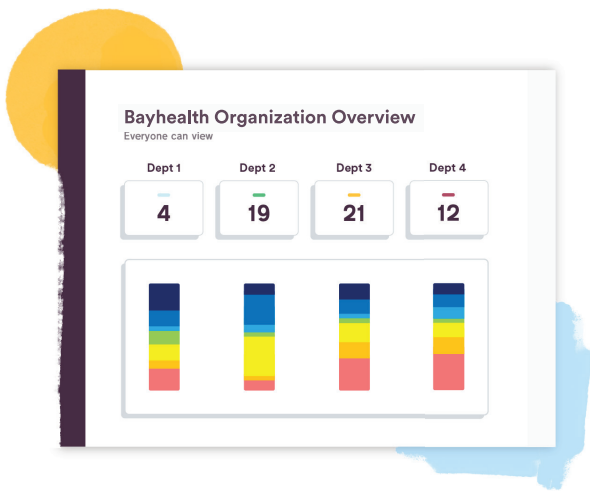

When something good happens, shout about it! Monitor success with ease, share learnings with your teams and spread the great work.

✓ Align with Priorities

Evaluate your organization's QI output against internal priorities. Assess which projects are meeting objectives and which ones need reviewing.

✓ Promote Consistent Practice

Improve success rate and accuracy by deploying consistent practice across your teams. No more duplication!

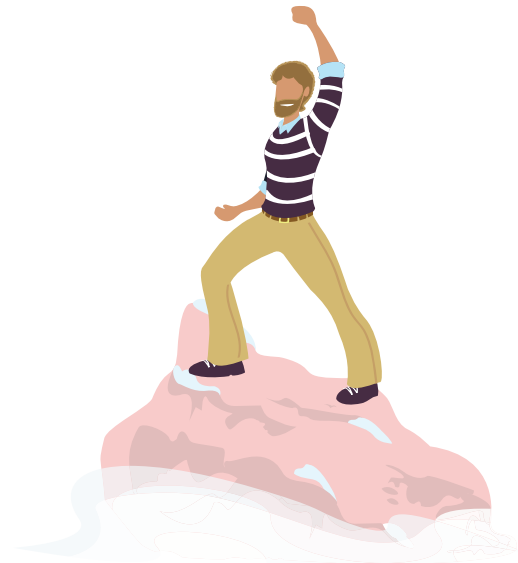

Track Everything

Keep on top of your organization's improvement work. Link all of your projects to the right part of the organization so you can accurately track improvement across every corner of the organization.

Monitor trends over time and easily identify the projects that are excelling and those that have stalled.

Empower your staff

Equip staff with the tools and skills they need to increase engagement, empowering them to run their own QI projects. Life QI inspires confidence and helps to support effective improvements to the patient experience.

Align your priorities

Ensure the projects that get started align with organization and departmental priorities so effort is focused where it matters and teams are clear on the areas for improvement. Use reporting and analytics to track progress against priorities and the return being delivered by these projects. Making it easy to identify high priority projects that need attention.

The Life QI platform is a MUST for anyone running quality improvement projects. It's easy to use, intuitive and accessible from any device connected to the internet. Most importantly, the QI charting functionality is one of the best out there!
