Your Improvement Portfolio

Healthcare organizations that embrace quality improvement are seeking better outcomes for patients, increases in productivity and efficiency and reduction in costs. Achieving and sustaining this at any scale requires purpose-built tools, accurate data and a culture of collaboration and sharing.

V Track Everything

Record every project ever started and track it throughout it's journey. Never miss a project or an update.

Celebrate Success

When something good happens, shout about it! Monitor success with ease, share learnings with your teams and spread the great work.

Identify Problems

Don't let projects stall, identify and support your team every step of the way, remove problem areas fast so projects can thrive.

Align with Priorities

Evaluate your organization's QI output against internal priorities. Assess which projects are meeting objectives and which ones need reviewing.

Multiply the Impact

Maximize the return of successful projects by easily spreading the improvement across the organization to scale up the results.

Promote Consistent Practice

Improve success rate and accuracy by deploying consistent practice across your teams. No more duplication!

OLifeQI

Track Everything

Keep on top of your organization's improvement work. Link all of your projects to the right part of the organization so you can accurately track improvement across every corner of the organization.

Monitor trends over time and easily identify the projects that are excelling and those that have stalled.

Multiply the Impact

Improvement realized in one department is great, but the benefits shouldn't end there. Maximize the impact of the proven changes by adapting and replicating into other parts of the organization. Use the evidence of successful change ideas as a template to spread and scale projects in other parts of the organization, ensuring you make the most of every proven change idea.

Create and Assign Tasks

Add tasks to set-up your test of change, assign the relevant people and include deadlines.

Get Notified

Stay in control of your organization's improvement work by receiving notifications of when new projects are started, progress scores are changed and reports are submitted.

Present Your Findings

With Life QI you get simple downloads for images of your diagrams and charts to include in posters and presentations.

Data Migration

Don't leave your data behind. Life QI can securely move data from your legacy system and efficiently manage all of your data in the same place.

Analyze Your Data

Automated calculation of control limits and identification of special cause variation get you to the insights you need.

Define Roles

Use roles to define your team members responsibilities and expertise.
