

TAILOR MADE BULK PACKAGING SOLUTIONS

QUALITY AND SERVICE FOR ALMOST A CENTURY

Our success is based on highly efficient customer-tailored supply chain management of FIBCs, with all necessary communication between production, transport partners, our local representatives and the customer's team. This package of services has always been our strength.

Dutch entrepreneurship

The Winza Products company was founded by the De Winter family in Enschede, the Netherlands, in the 1920s. The company traded jute for the domestic Dutch market. Gradually, jute sacks were replaced by synthetic woven materials that are mainly sourced outside Europe (e.g. Asia). Now under the management of the third and fourth generation De Winter, the company has evolved from a small trading company into a leading global player in the field of bulk packaging solutions, while remaining committed to the personal factor in business relations.

**'We always solve the
packaging challenges of
our customers!'**

SERVING OUR CUSTOMER'S PACKAGING NEEDS

Masterpack Group is a leading industrial packaging company. With our head office and R&D department in the Netherlands and several production sites in the Far East, we serve customers and partners in almost every country in the world. Through new technologies and innovations we continue to tap into new and emerging market opportunities. We conduct our business in accordance with the principles of sustainable development.

Our main targets

- We help our customers to be even more successful. We are constantly developing new products and services in close collaboration with our partners and customers. Thanks to extensive R&D partnerships with key customers we are able to offer tailor-made solutions that ensure our mutual success.
- We are dedicated to sustainable development. We strongly believe that combining economic success with environmental protection and social responsibility leads to a truly sustainable way of doing business.

**'We serve our
global customer's
packaging needs.'**

STATE-OF-THE-ART MANUFACTURING PLANTS

As an innovative company with a very strong R&D department in the Netherlands, we serve our customers in all corners of the world from our production facilities in Thailand, China, Bangladesh, Turkey, Bosnia and Sri-Lanka.

As a leading supplier in the pharmaceutical, chemical and food industry, production takes place under the best hygienic circumstances with state-of-the-art equipment. Vertically integrated and completely secluded production areas guarantee the highest hygiene standards in all production processes.

- In-house development
- State-of-the-art clean rooms
- Fully integrated production facilities
- ISO 9001, ISO 14000, ISO 22000
- BRC, AIB
- GMP, HACCP, HALAL
- SA8000, SEDEX
- Class 10,000 liner production
- Class 100,000 FIBC confection
- Secluded loading and packaging areas

A BROAD RANGE OF PACKAGING SOLUTIONS

We analyze the individual needs of our customers and develop the best possible bulk packaging solutions on that basis. We specialize in total solutions: high performance characteristics to your products such as 100% dustproof, full protection against any contamination, thoroughly hygienic FIBC's for delicate products, and maximum stability. And all this, for a favorable price-to-performance ratio. We use all available barrier foils for our lined FIBCs such as conductive, aluminum, anti-static, dissipative, metalized OPP, EVOH and PA liners. For a safe working environment, all our FIBCs can be designed and produced as a UN Bag or as a conductive Type B, Type C or Type D FIBC.

- **PowerQube®** FIBC with form stable liner: stable, strong, square and hygienic
- **PowerTube®** FIBC with pre-shaped liner: perfect fit and hygienic
- **TopTube®** pre-shaped liner FIBC with a unique top construction: hygienic, tight and cost-effective
- **TopQube®** form stable FIBC with a unique top construction: hygienic, tight and square
- **CleverQube®** a unique form stable FIBC with pre-shaped liner: hygienic and unique
- **Square Shape** FIBC FIBC with baffles of woven fabric or with PP net

**'We have exclusive
warehouse facilities to ensure that
customers receive their products
within a few office days'**

DEDICATED TO SUSTAINABLE DEVELOPMENT

We strongly believe that combining economic success with environmental protection and social responsibility leads to a truly sustainable way of doing business. Only then can we contribute to ensuring a bright future for the coming generations. For example, in addition to implementing the Social Accountability Management System (SA8000 and Sedex) in our manufacturing plants, we started a project that gives employees and their families more opportunities in education. We are also implementing the ISO 14000 system to help our production facilities minimize processing costs that negatively affect the environment.
