

Bacteria doesn't stop... Neither should you.

Fight back with a proven waterline product you can trust!

Backed by science & proven in practice.

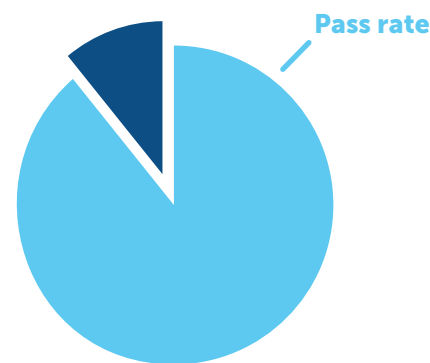

Treatments are failing you 31% of the time!

On average, 31% of treated waterlines fail to meet the CDC standard for safe water (≤ 500 CFU/mL)*. Regardless of a treatment's promise, unless it performs in the real world, what's the point? Make sure your practice is using a waterline maintenance protocol backed by science and proven in practice.

Why dental professionals rated BluTab[®] as the best waterline treatment product.

BluTab[®] Because it Works.

- Shares highest real-world efficacy rate of 88%*
- Exceeds CDC standard by 50x
- Simply add 1 tablet with each water bottle refill
- One of the most cost-efficient waterline treatment products available
- 4 time Dental Townie Award Winner (2017-2020) for best waterline treatment product

*Study cited in "Treating & Monitoring Dental Water", Compendium of Continuing Education in Dentistry, by Nancy Dewhirst, RDH, BS & John A. Molinari, PhD. Data collected from 22,196 consecutive waterline tests (R2A, heterotrophic plate count tests) conducted in 2017 by ProEdge Dental Water Labs. All product types provided by dental offices. Averages may not reflect your test results. All Pass/Fail measured against CDC's ≤ 500 CFU/ml standard.
