

Bacteria doesn't stop... Neither should you.

Fight back with a proven waterline product you can trust!

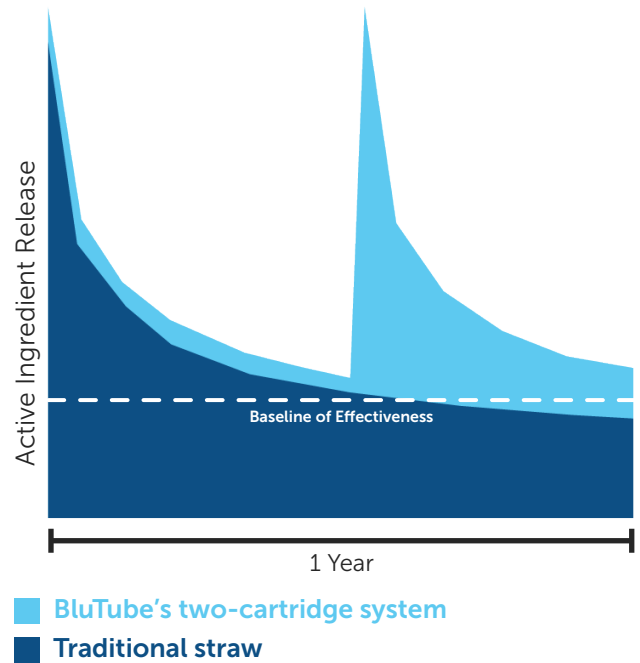

Backed by science & proven in practice.

Treatments are failing you 31% of the time!

On average, 31% of treated waterlines fail to meet the CDC standard for safe water (≤ 500 CFU/mL)*. Regardless of a treatment's promise, unless it performs in the real world, what's the point? Make sure your practice is using a waterline maintenance protocol backed by science and proven in practice.

How BluTube® is designed to be the most effective waterline treatment product.

- Demand Release Technology™ actively targets bacteria for increased effectiveness.
- Two-cartridge system treats waterlines with 40% greater power.**
- Installs in minutes and can be used with tap or distilled water.
- Safe for patient contact, non-toxic, non-allergenic, and non-corrosive.
- Includes 6-month automatic replacement indicator for convenient reminder.

*Study cited in "Treating & Monitoring Dental Water", Compendium of Continuing Education in Dentistry, by Nancy Dewhirst, RDH, BS & John A. Molinari, PhD. Data collected from 22,196 consecutive waterline tests (R2A, heterotrophic plate count tests) conducted in 2017 by ProEdge Dental Water Labs. All product types provided by dental offices. Averages may not reflect your test results. All Pass/Fail measured against CDC's ≤ 500 CFU/mL standard. **Based on total active ingredient release over the course of 365 days or 240L following instructions for use (replacing BluTube cartridge at 6 months).
