NHADA OPPOSES HB 1426-FN *REPEALING ANNUAL INSPECTIONS IS AN UNSAFE IDEA*

The New Hampshire Auto Dealers Association is a statewide trade association, representing the interests of the motor vehicle industry.

NHADA consists of: all of the new-car and new-truck dealers in the state, along with motorcycle, snowmobile, on and off-road recreational vehicle, farm equipment, used-car, power equipment, and construction equipment dealers, as well as independent motor vehicle service, auto body repair, and motor vehicle parts sales facilities.

NHADA Opposes HB 1426-FN: The annual vehicle safety inspection process is about maintaining safe NH vehicles and roadways for motorists in our state. Similar legislation has been proposed over the years to modify the state's vehicle safety inspection program. The most recent attempt was in 2018 which the Transportation Committee overwhelmingly voted to ITL as did the House of Representatives by a vote of 258-70. Many other attempts, including 2006, 2008, 2009, 2011, 2015, and 2017, all have been defeated.

Analysis: NHADA opposes HB 1426-FN for the following reasons:

- Vehicle inspections can catch recalls that effect the safety of the vehicle and save consumers money. The annual inspection program catches safety deficiencies that are covered under manufacturers warranties that NH consumers do not have to pay out of pocket.
- The Institute for Research in Public Safety and the National Highway Transportation Safety Administration, mechanical defects and/or worn equipment on vehicles was a causative or an aggravating factor in 12.6 percent of crashes-over 850,000 accidents could have been avoided.
- A Pennsylvania study conducted in 2009 concluded that state inspections play a significant role in saving lives. It stated that the Pennsylvania inspection program has reduced the number of fatal crashes by 115-169, saving 127-187 lives. If the annual inspection program in NH saves but 1 life, it's worth it!
- Preventative maintenance and annual inspections save the consumer money. A steering component repair can cost \$300 versus a steering component failure can cost over \$3000.
- Annual vehicle inspections are the best value on Main Street. The competitive free market determines the cost of an annual inspection and provides the NH consumer with expert advice on their vehicle from a trained and NH licensed technician. With annual inspections, problems can be found while vehicles are still covered by the manufacturers' warranties, saving citizens money!
- All of our neighboring states have inspection requirements. ME, MA, VT, PA, and NY all have annual

safety inspections. Our New England climate and road conditions are contributing factors.

- New Hampshire has a high vehicle failure rate, even with an annual inspection program. The 2019 rate was at least 15% for critical inspection items such as brakes, tires, and steering. Because of the way vehicle failure are reported the numbers are likely much higher than 15%. *See Charts

| Test Year | 2020 | |
|---------------------------------|-----------|--------|
| Total Safety Tests | 1,562,220 | |
| Total Safety Deficiencies | 231,050 | 14.79% |
| Most Common Safety Deficiencies | | |
| Brakes | 78,422 | 5.02% |
| Steering | 55,726 | 3.57% |
| Tires | 44,775 | 2.87% |
| Body/Chassis Rust Defects | 15,761 | 1.01% |
| Stop Lights | 9,614 | 0.62% |

| Test Year | 2019 | |
|---------------------------------|-----------|--------|
| Total Safety Tests | 1,598,283 | |
| Total Safety Deficiencies | 250,580 | 15.68% |
| Most Common Safety Deficiencies | | |
| Brakes | 86,079 | 5.39% |
| Steering | 64,288 | 4.02% |
| Tires | 51,846 | 3.24% |
| Body/Chassis Rust Defects | 17,628 | 1.10% |
| Stop Lights | 11,433 | 0.72% |

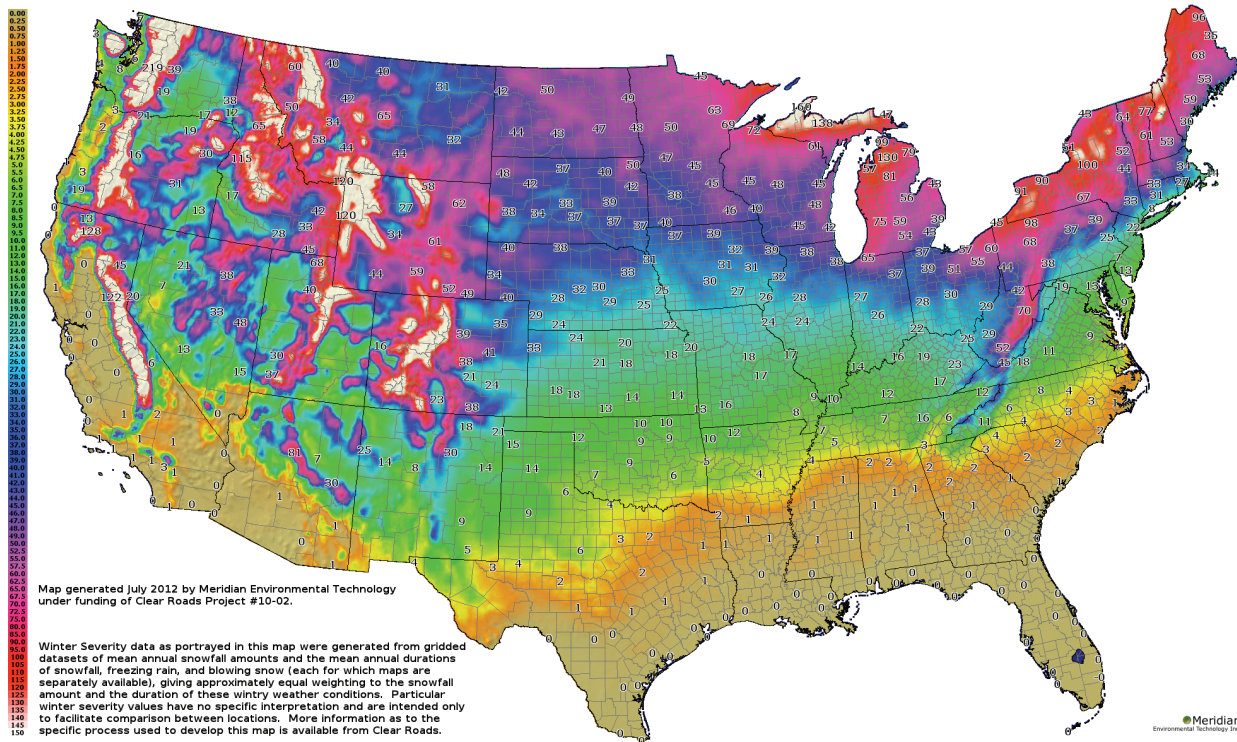

| Test Year | 2018 | |
|---------------------------------|-----------|--------|
| Total Safety Tests | 1,596,201 | |
| Total Safety Deficiencies | 248,430 | 15.56% |
| Most Common Safety Deficiencies | | |
| Brakes | 82,673 | 5.18% |
| Steering | 65,364 | 4.09% |
| Tires | 51,558 | 3.23% |
| Body/Chassis Rust Defects | 19,770 | 1.24% |
| Stop Lights | 12,810 | 0.80% |

- HB 1426 will have a significant fiscal impact to the state and local municipalities: the bill will cause an over \$800k revenue decrease annually
- HB1426-FN will be difficult impossible to enforce by local and state law enforcement: determining if a vehicle is company owned and not being used for commercial purposes while on the road will be impossible * See Pictures

- New Hampshire has a very harsh climate. Weather causes vehicles and components to wear out a lot faster than other states. We cannot compare our inspection program to other states, such as Arizona, California, Florida, and Colorado (a drier but snowy state). *See Winter Severity Map
- HB1426-FN is opposed by NHADA, AAA, DMV, DOS, NH Motorcyclists Rights Organization, and the NH Traffic Safety Commission,

U.S. Winter Severity for Winter Road Maintenance

Comments: Vote ITL (inexpedient to legislate) on HB 1426-FN! Keep NH Roads and citizens safe. The NH Automobile Dealers Association represents over 550 members and 13,000 employees involved in motor vehicle businesses in NH and strongly oppose HB 1507. For further information please contact Dan Bennett or Pete McNamara at 1-800-852-3372.

What NH Citizens are Saying:

Michelle Lapointe Bernier

Have you seen the cars from states with lax inspection laws? This is not smart imo.

Don Flibotte

Why so you can drive a unsafe vehicle on the road ?

Melodye LaChance Smith

I think inspections save lives. If your car fails, fix it. Unmaintained cars will and can endanger lives!
