

#053 : How to achieve Digital Supply Chain ?

Digitization is the need of the hour. As supply chains are extremely complex, achieving a «true» digital level will be a incremental journey.

The perceived benefits are, however, evident now. Apart from providing a clear competitive edge, digitization will result in greater efficiency and open up additional revenue streams and new business models.

Major Components

Integrated
planning and
Execution

Supply chain
visibility

Predictive
and
prescriptive
supply chain
analytics

Smart supply
chain entities

Procurement
