Who We Are

M2GEN is seeking people who are passionate about making a difference in the lives of cancer patients and who want to join a science-focused and purpose-driven team. In order to be a leader in creating and delivering health informatics solutions through evidence-based approaches to predict and meet the needs of cancer patients, we need an all-star team. Be part of the cure by joining M2GEN's team and impacting the future of cancer care.

We are a fast-growing company and if you are interested in data, science, or medicine and want to help us make precision medicine a reality, review our current open positions and apply today. https://www.m2gen.com/

What You Will Do

As the Senior Clinical Abstractor, you will be Responsible for functional team rapid data abstraction, data management and data analysis in the ORIEN & M2Gen Data Systems in compliance with ORIEN & project-level guidelines consistent with the American College of Surgeon's Commission on Cancer accreditation program and other mandated reporting requirements. Responsible for data retrieval, data comprehension and data integration in the full spectrum of all disease sites of cancer (Diagnosis; Clinical and Pathological Staging; SEER Summary Staging and Treatment Coding and classification). Independent oversight of functional team performance and throughput, exercising discretion and solid judgment to meet contractual obligations of internal and external client deliverables.

What You Definitely Need

BACHELOR'S DEGREE in Computer Science or similar in Biology, Biomedical Sciences, Public Health, Health Sciences, Epidemiology, Computer Science, RN, or other related field.

Must be a Certified Tumor Registrar (CTR)

Minimum eight (8) years or more cancer registry abstracting or oncology experience and medical record review.

Minimum eight (8) years or more experience in analyzing, coding and abstracting medical records.

Experience utilizing database technology and EMR (Electronic Medical Records) system.

Minimum eight (8) years or more working knowledge of medical technology

Minimum eight (8) years or more working with Microsoft Office and other PC database applications.

It Would Be Great If You Also Had

Minimum eight (8) years or more cancer registry abstracting experience in an American College of Surgeon's Commission on Cancer NCI designated or teaching/research approved program.

Oncology specific technology.

Strong typing skills.

Demonstration of strong verbal, written, listening and analytical skills.

Ability to work with minimal supervision in a quickly changing environment.
