

Enclosure Heating and Cooling Solutions

HOFFMAN

SPECTRACOOL WITH ADVANCED CORROSION PROTECTION

The newly standardized corrosion solutions for **HOFFMAN'S SpectraCool Series** of air conditioners provides closed-loop cooling for environments exposed to corrosive chemical elements. Products in these environments are prone to accelerated failure rates due to chemical attack. Hoffman utilizes advanced coatings to protect components critical to the performance of the air conditioner.

KEY BENEFITS

Diminish the risk of overheating valuable components inside the enclosure

Reduce downtime and replacement costs

Maintain optimal performance for extended periods in detrimental applications

Extend the life of the air conditioning unit

APPLICATIONS

- Tire Manufacturing Plants
- Food Processing Facilities
- Waste Water Treatment Plants
- Pulp and Paper Mills
- Petrochemical Refineries
- Chemical Processing Plants

PRODUCT SPECIFICATIONS

- Based on SpectraCool and SpectraCool Narrow series
- Corrosion protection solutions on condenser and evaporator sides
- BTU Range of 4,000 to 20,000
- R407c and R134a earth-friendly refrigerants
- 115, 230 and 400/460 VAC 3-phase power input on most models
- Operating temperature range from -40 F/-40 C to 131 F/55
- Compressor heater and malfunction switch
