

Facilities Management Handover - Equipment Maintenance

Call for Sponsors

There is a growing need to better manage the information for facility management (FM) in the built asset industry. As the use of BIM for project delivery has expanded and matured around the world, so has the handover of data generated by the process for operational and asset management uses by owners. FM data exchanges can now be found in projects across many countries, especially where national governments have mandated the delivery of such data. However, variations in owner's sets of requirements have introduced widespread inconsistency in the specification, enforcement, delivery, and use of data to meet those needs. Thus, buildingSMART International sees it is now crucial to re-examine the FM data exchange use cases and update the current international standards. A new bSI Building Room project, as part of the bSI Process, will examine the state of the industry and apply lessons learned to the development of a new FM Handover standard framework and a common use case for equipment maintenance.

Opportunity for you

buildingSMART International is calling on industry sponsorship to fund the project. This exciting opportunity comes with a variety of benefits, including free membership for new members to bSI for the remainder of 2021. Sponsors will:

- Be part of an international effort
- Collaborate with other industry professionals in project delivery and operations
- Be viewed as leaders in the development of a new FM data exchange standard
 - Have global exposure through the bSI communications network

Funding goal: €300,000

€10,000
-
€30,000

This level of sponsorship will help the project team initiate and develop the international Facility Management Handover – Equipment Maintenance (FMH-EM) project. Sponsors at this level benefit from:

- Free Standard membership to bSI for the remainder of 2021
 - International recognition as a project sponsor
 - A seat on the Project Steering Committee, as well as active development roles
- Eligibility to be elected to a bSI Room Steering Committee

€2,000
-
€10,000

This level of sponsorship allows your organization to participate in the development of this international standard as an active member of the project Requirements or Technical Team.
