

| Category | ENCOR-a On Prem | ENCOR-a Cloud | Notes |
|--|--|---|--|
| Data Acquisition | Meditech based. ENCOR-a 'sits' directly atop the facility server and data is received during the nightly refresh. There are no file imports. | Exceptions: Covenant Health, KePRO (DoD), New Bridge, and Signature Health are file import clients but exist on a remote server. Monthly files are received from the mentioned clients and imported by clinical consultant. Different file specifications are used for these facilities; Maintained by Engineering. | |
| Artesia General Hospital has a unique system setup and build related to the EHR utilized by the facility where data is pulled. | File import-based model; Uses Medisolv Specifications maintained by Data Intake. | | |
| Architecture | On-Prem ENCOR-a does not exist without the Medisolv RAPID application being installed regardless of whether the facility purchased RAPID or not. | Cloud Model | |
| Administration>Facility Admin>Payment Source Mapping | Available | Not Available | Maps Insurance from Meditech DD to CMS allowable values. |
| Administration>Facility Admin>Race Mapping | Available | Not Available | Maps Race from Meditech DD to CMS allowable values. |
| Administration>Facility Admin>Ethnicity Mapping | Available | Not Available | Maps Ethnicity from Meditech DD to CMS allowable values. |
| Abstraction>Save and Lock | Not Available | Available | |

| | | | |
|--|--|---|--|
| Home>Sampling Schedule | Not Available | Available | |
| | EA On-Prem supports Monthly Sampling or Do Not Sample. | Weekly Sampling Schedule is listed on HOME Page for EA Cloud only. Weekly sampling for EA Cloud is automated and occurs every Saturday. | |
| Concurrent Abstraction | Concurrent Abstraction List automatically populates for On Prem Clients. This is inclusive of Current Inpatients and Cases Discharged but not final coded. | Can be imported or there is an add a case feature. | |
| Administration>Medisolv Admin>Quality Measures Quarterly Report | Available only for KEPRO/DoD | Not Available | |
| Administration>Facility Admin>Invalid Import Results | Not Available | Available | |
| Administration>Facility Admin>Generate Patient Population Report | Not Available | Available | |
| Administration>Facility Admin>Clinical File Rejections | Not Available | Available | |
| Reporting>Population>Cases No Longer in Population | Not Available | Available | |
| Reporting>Population>HF Population | Not Available | Available | |
| Reporting>Population>Quarterly Population and Sampling Report | Available | Available - Quarterly Population and Sampling | |
| Reporting>Miscellaneous>User Access Report | Not Available | Available - User Access Report; The report is linked to CITC and will not be available to the ENCOR-a On-Prem clients. | |
| Reporting>Data Quality>Visit Details Change Log Report | Available | Not Available | |
| Administration>Facility Admin>Delete Visits | Available | Available | |

| | | | |
|---|---|--|---|
| | Worksheets are static | Delete Visits - The EA Cloud system has an overwrite function due to the file import nature of this system. This requires a Lock feature to prevent the overwrite of the case(s) located within the worksheet. The abstractor must lock the case to prevent overwrite of data already abstracted during the file import. | |
| | There is no overwrite as well as no Save and Lock feature. | | |
| | The Lock Quarter function can be utilized by the Medisolv Admin to hide the quarter and prevent user access. This feature is located under Administration>Medisolv Admin>Lock Quarter | | |
| Reporting>Provider Information | Available | Only Attending and Emergency Providers are pulled and populated automatically within worksheet. | |
| | Available | NOTE: The EA Cloud client can provide a Provider File (or not) to be loaded for their organization/facilities. If a file is provided, the Provider Reports will display under Reporting. | |
| MassHealth Measure Sets>CCM/MAT-4/NEWB-1 | Not Available | Available | NOTE: You can enable the measure sets, but the On-Prem (Meditech, specifically) IPPs are not set up to bring anything in. The import IPPs are set up to bring in cases. |
| Administration>Medisolv Admin>Vizient Exports | Available | Available | |

| | | | |
|------------------------------------|--|---|--|
| Administration>User Administration | For On-Prem clients, there is no username or password required for a user to access the facility because it is passed from the RAPID Active Directory. | If User Administration and User Access are completed, the user simply needs the URL to access ENCORA for On-Prem. | |
| Accessing On-Prem vs EA Cloud | Via Bomgar to individual server for facility with assist from Thycotic | Via web browser link https://encora.medisolvcloud.com | Not all On-Prem facilities are accessed via Bomgar. Example: Hilo is via a different secure portal. Use Thycotic for notes concerning access if a facility is not found. In addition, there are On-Prem facilities where an individual username/password is required to access their server. |
