## Worksheet Comparison

| Meditech DR | Cloud Application |
|---|---|
| Save & Continue | Save & Continue |
| Save & Exit | Save & Exit |
| | Save & Lock Cloud Application Only (Locks any associated Worksheet) |
| Tool Bar- Visit Details Meditech DR only | |
| Tool Bar- E-Measures Meditech DR only (available for ENCOR-e clients) | |
| | Unlock Worksheet icon Cloud Application Only (Unlocks any associated Worksheet) |

## Provider Information Comparison

| Meditech DR | Cloud Application |
|---|---|
| Data pulled from Meditech | A provider dictionary is imported as often as needed. |

## Data Flow Comparison

| Meditech DR | Cloud Application |
|---|---|
| Our product sits directly on top of the Meditech DR (EHR).<br><br>Medisolv's ENCOR Hospital Abstracted data is static.<br>Data is not automatically updated. If a change is needed to the worksheet, you can manually edit the worksheet.<br><br>Some data cannot be manually updated, such as Date of Birth, EM code. If this is the case, you will need to delete the existing worksheet and wait for the nightly refresh to update the information.<br>• If your worksheet is in a sampled measure, the case will not return to your abstraction list, but will return to the population to be counted.<br>• If the case is not sampled, it will return to the abstraction list. | Web-based application. Only information submitted through the file import comes into ENCOR.<br><br>A new file must be submitted for data to be updated. If a change is needed to the worksheet, you can manually edit the worksheet.<br><br>Some data cannot be manually updated, such as Date of Birth, EM code. If this is the case, you will need to import a new file with the corrected information.<br><br>Remember to Unlock the worksheet before the file import is submitted so the data can overwrite in the worksheet. |

## Sampling Comparison

| Meditech DR | Cloud Application |
|---|---|
| Do Not Sample | Do Not Sample |
| | Weekly Cloud Application Only |
| Monthly | Monthly |

## Concurrent Abstraction Comparison

| Meditech DR | Cloud Application |
|---|---|
| Concurrent Abstraction List automatically populates for On Prem Clients. This is inclusive of Current Inpatients and Cases Discharged but not final coded. | Concurrent patient data can be imported or there is an add a case feature. |

## Inpatient Days / Leave Days Comparison

| Meditech DR | Cloud Application |
|---|---|
| Data pulled from Meditech | Data manually entered through the Event Measures grid on the Abstraction page. |
