

RxWell™ Tracing

Be safe, feel safe, and stay safe

RxWellTM Tracing

SIMPLIFYING ADHERENCE TO THE RULES OF REOPENING

Cutting-edge tools that use **social distancing badges** that **vibrate and light up** when users are within 6 feet of other badge users to **promote and reinforce better social distancing behaviors**. Data is collected and aggregated to create **personal and community social distancing compliance scores**. As an additional option, badges can be used to **conduct contact tracing** and comply with government public health regulations.

KEY FEATURES

Personal social distancing badges that provide behavioral reinforcement and social distancing data in a secure, local manner

Individual, in-app dashboards that give employees insights to their own and community level behavior

Ability to assign badges to individual employees to perform contact tracing functions

Note: Features can be sold separately and require hardware installation

RxWell Product Suite

					
<p>A comprehensive, data-driven set of tools to provide users with real-time information regarding a building’s overall wellness to instill a sense of confidence in the safety of reopening indoor activities. Insights include adherence to government-mandated public health capacity regulations; critical indoor environmental metrics such as CO2 and humidity, which can potentially impact COVID transmission; and enhanced building access protocols such as CDC-guided public health questionnaires and digital visitor management.</p>	<p>A comprehensive, data-driven solution to support a safe return to the office for companies and their most important asset – their people. Features include space capacity management, workforce rotations, and administering digital CDC-guided public health questionnaires through the RxWell app to help ensure a safe re-officing environment. Company leaders have the option to add on additional functionality – such as virtual care or AI to monitor mask and social distancing compliance– to instill a greater sense of confidence that the indoor environment is safe.</p>	<p>A comprehensive, data-driven solution for restaurants to responsibly reopen indoor dining, while giving their customers peace of mind. The offering includes essential tools to monitor restaurant capacity, social distancing and mask compliance, temperature-taking, tracking and tracing capabilities, and maintaining optimum CO2 and humidity levels – key air quality metrics that can impact COVID transmission. All of this is centered around our proprietary Restaurant Wellness Index (RWI) – a single, easy-to-digest score for restaurant owners to track overall indoor dining wellness.</p>	<p>An AI-powered wellness protocol compliance monitoring program that provides a hassle-free compliance monitoring and reporting system. The program creates the infrastructure to automate the monitoring of adherence to wellness protocols and standards such as space capacity, social distancing, and mask-wearing in a physical space.</p>	<p>A multi-pronged, proactive approach to preventing outbreaks before they happen. Our robust line of viral detection services provide (1) routine and on-demand COVID diagnostic testing and (2) proprietary technology that preemptively detects COVID-19 (and other public health threats such as the flu) on indoor surfaces and in the indoor atmosphere.</p>	<p>Cutting-edge tools that use social distancing badges that vibrate and light up when users are within 6 feet of other badge users to promote and reinforce better social distancing behaviors. Data is collected and aggregated to create personal and community social distancing compliance scores. As an additional option, badges can be used to conduct contact tracing and comply with government public health regulations.</p>
