

# Asset Framework Accelerator

DATASHEET

## What is Asset Framework Accelerator?

Element AF Accelerator™ is a packaged solution, integrating advanced technology – Element Unify – the Industrial Data Method and Element’s Asset Framework Data Engineering Services. AF solutions are designed to solve the most difficult issues associated with building, scaling and maintaining OSIsoft Asset Frameworks – fast.

## AF Challenges

-  **Context**  
Associating PI tags with Metadata held in your CMMS system and P&ID drawings at scale.
-  **AF Template Management**  
Managing centralized template definitions and syncing with deployed AF’s.
-  **Hierarchy Management**  
Delivery of multi-view hierarchies – ex. corp ISA view plus maintenance and reliability hierarchies.
-  **AF Governance**  
Sync multiple AF deployments across enterprise, identify and fix local changes that break AF functionality.

## Key Features

- Rapid AF Deployment:** Typical project delivered in four to eight weeks
- Industrial Data Method:** Agile framework designed specifically for delivery of asset data modeling
- Asset Framework Management:** Software suite quickly syncs and updates disparate AF models
- Coaching:** Integrated training delivered by video and Element personnel
- Analytics:** Deliverables include analytical applications and dashboards
- Advanced Technology:** Suite of software designed to speed AF build, maintenance and scale

### AF ACCELERATOR TIMELINE

**1-2 Weeks**  
Build

**3-4 Weeks**  
Explore

**5-8 Weeks**  
Deploy

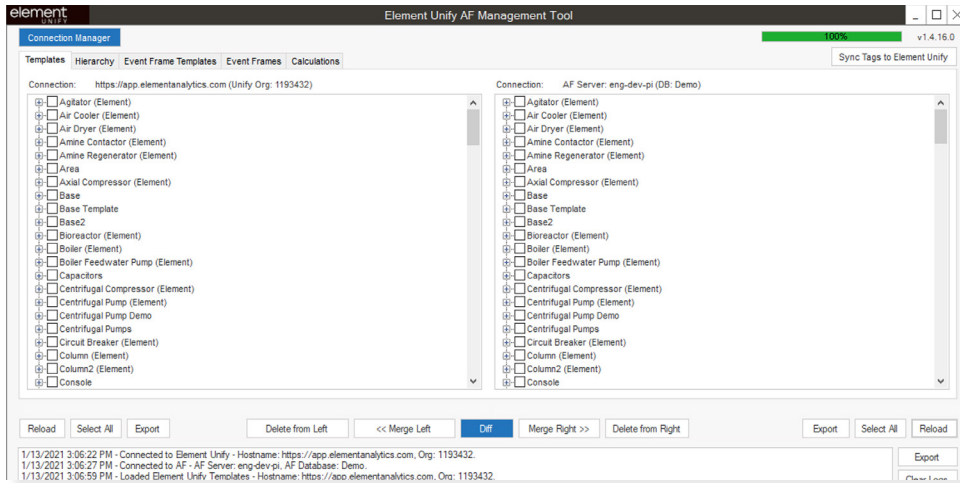

# The Element AF Accelerator is helping to align flexible hierarchical views across our maintenance, APM, and operations systems.

Mike Greene, Operations Technology Leader | Nova Scotia Power

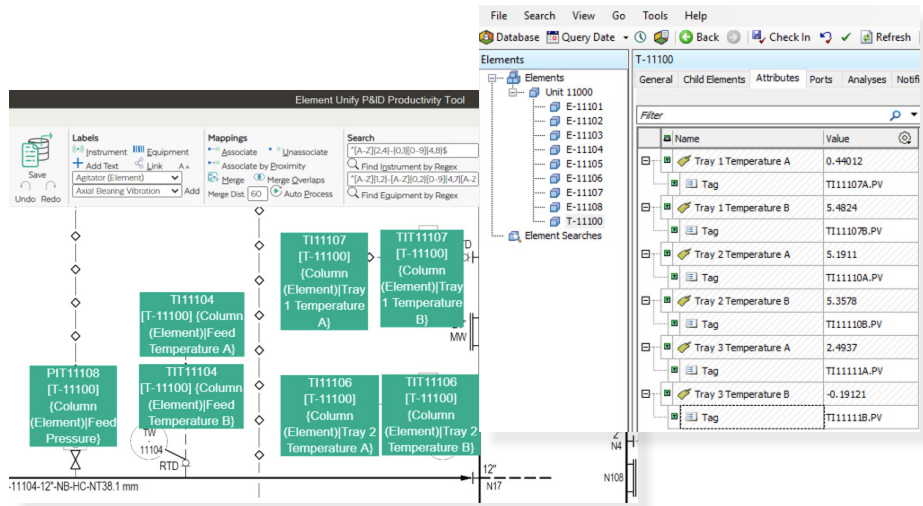

## State of the Art Technology

**Asset Framework Management Tools**  
Simplify AF configuration management with auto load, evaluate, compare, merge and remove functions.

### P&ID Content

Automates harvesting of context from P&ID's eliminating complex spreadsheets reducing AF deployment time.

### BENEFITS

**10X**  
acceleration in time to insights

**15X**  
reduced efforts to ensure data quality

**90%**  
gain in employee productivity

**100X**  
increase in the usability of data in decision making

### About Element

Element powers digitally-enabled operations for the Industrial Enterprise. Tackling one of the most critical gaps in Industrial IoT — the fact that 95% of data across the Industrial Enterprise is unusable because it's fragmented and disconnected — Element Unify breaks through the data silos by bringing IT and OT data together for the first time on a single solution. With Element Unify, IT and OT teams can collaboratively make data-driven operational and business decisions around rich, contextualized metadata, while ensuring scale, reliability and security.
