

## PULPWOOD SPECIFICATIONS

Revised 1/9/19

### SPECIES ACCEPTED

1. HARDWOOD - All deciduous species **except willow.**
2. PINE - All coniferous species **except red cedar.**

### LENGTHS

Wood will be received in random lengths in two basic classes.

<u>Class</u>	<u>Length</u>
I	8' - 15'
II	16' - 22'

1. Length classes must not be mixed within the same rank.
2. Wood must not be double-ended within the same rank ( example: two 9' pieces making an 18')

### THE FOLLOWING WILL NOT BE ACCEPTED:

- 1) Wood **smaller than 4"** in diameter.
- 2) Wood **shorter than 8'** in length.
- 3) Wood **larger than 24"** in diameter at any point on the log.
- 4) Wood with **sweep or crook exceeding 24"**.
- 5) Willow or red cedar wood.
- 6) Fire-charred wood.
- 7) Wood containing metal.
- 8) Improperly trimmed wood.
  - a. Wood must be saw cut on both ends.
  - b. Knots and limbs must be cut flush with the stem.
- 9) Wood with any splitting, shattering or splintering of any type or length.
- 10) Wood with hollows in excess of 25% of the diameter that the hollow extends more than 2' into the log.
- 11) Rotten, decayed, or unsound wood.
- 12) Wood delivered without proper authorization.
- 13) Loads with mud, stones, trash or plastic, including plastic flagging on trees.

### TRUCK LOADING AND RIGGING

1. Rigging and loading method must be approved by a Pixelle representative prior to the initial delivery.
2. All trucks must have a minimum of 60" between standards supporting any rank of wood.
3. Standards must be placed so the unloader can grasp the rank near the balance point.
4. Trucks must have risers of 6" above the truck bed.
5. Wood must not be interlocked between ranks or sticking through the head gate.
6. Pine and hardwood must not be mixed in the same rank.
7. Pixelle is not liable for any damage to trucks caused by wood falling from mixed classes or improper loading of trucks.
