SYSTEMS
engineering

LEARN. CONNECT. GROW.

Systems Engineering is a leading IT strategy and managed services provider serving legal, healthcare, financial services, and government clients nationwide. Established in 1988, Systems Engineering is 100% employee-owned with offices in Portland, Maine, and Manchester, New Hampshire.

Systems Engineering's internship program sets our interns on the path to career success; offering paid internships in a variety of technical and non-technical roles within multiple departments across our organization. Interns join our program to engage in hands-on work and gain experience through:

- **Mentoring**
- **Experiential based work experiences**
- **Job shadowing**
- **Cross team collaboration with internal & external stakeholders**
- **Technical skill building**
- **Professional Development opportunities and more!**
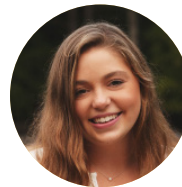

MADY
2019 Summer Intern

Systems Engineering is a company that goes above and beyond in terms of teamwork, innovation, and technology. As a summer intern, I worked collaboratively with three different groups who welcomed me as part of the team. I was able to pursue experiences relating to technology and business processes, venturing into new projects while expanding my network.

MATT
2019 Summer Intern

This experience was the perfect adjunct to my USM education. During the 14-week summer internship, I was able to apply IT concepts learned in the classroom to the real world and grow in my understanding of it all. Sysytems Engineering's talented professionals welcomed me as part of the team and generously offered their knowledge, skills, and experience. After the program ended, I accepted a full-time position within the company.

BE PART OF OUR CULTURE

- **Learn & be part of our 100% employee-owned culture**
- **Connect with other IT professionals through virtual and/or in person team building and company-wide events**
- **Engage in ongoing learning & development programs to further your IT career**

ENJOY THE BENEFITS

- **Paid internship with paid volunteer service**
- **A speaker series that introduces you to IT industry leaders**
- **Health & Wellness Initiatives (yoga, fitness challenges, and more!)**
