

Unlike other pet containment systems, our trainers provide customized training over a few weeks, so your pets can learn at their own pace.

Your pets are always in control of how much or how little training is needed. We gain insights into your pets' activity by checking their interactions with our patented technology and let them tell us when they are ready to move forward in the training process.

Our proprietary technology gives us info on how your pets are interacting and learning on the system even when no one is looking. We use this data to customize your pet's training throughout the process. Pets are unique and each learns at their own pace. We also use their breed, temperament, and life history to customize the training program just for them.

With Perfect Start™ Plus Training, Invisible Fence® Brand ensures you will be living better with your pets in no time.
