

Easy Drain®

Dryphon®

THE REVOLUTION IN
DRAINAGE TECHNOLOGY

Patented technology

ESS

MORE POWER, LESS CLEANING

Easy Drain® presents the next generation Clean series shower drains with Dryphon® technology. This patented “dry-siphon” system blocks odour from the sewer and reduces cleaning to a minimum.

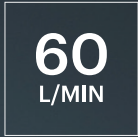

Patented technology

LESS CLEANING

Thanks to the high flow rate, dirt and hair cannot attach, which reduces cleaning to a minimum.

MORE POWER

The patented design provides a significant improvement in drainage capacity, up to 60 liters per minute. This exceeds all standard requirements and regulations.

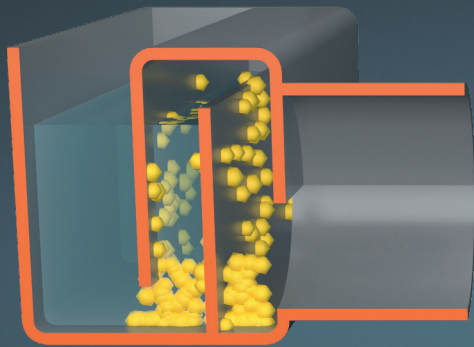

NO ODOUR

Permanently blocks odour from the sewer. It doesn't use water, so it can't dry out and lets odour through.

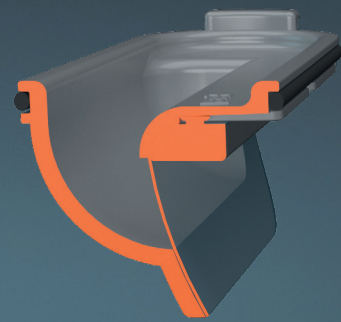

VENTILATION

Regulates pressure differences in the sewer while blocking sewer gasses.

SIPHON TECHNOLOGY

Hair and dirt can build up

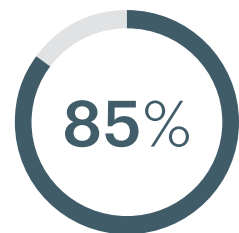

DRYPHON® TECHNOLOGY

Hair and dirt flow through

SAVE TIME AND IMPROVE HYGIENE

With Dryphon® technology, you reduce cleaning your shower drain to an absolute minimum, which improves hygiene and more importantly it saves a lot of time.

Less cleaning

Time saving

Better hygiene

// A WORLDWIDE SUCCESS!

Dryphon® technology is used successfully in bathrooms worldwide. Some of the largest hotel groups in Europe have upgraded their Easy Drain with Dryphon® technology. A housekeeping manager explains:

"We have to clean a lot of rooms in the shortest time possible. Thanks to this upgrade, we need considerably less time to clean the shower drain and can focus more on getting the bathroom sparkling clean. This is a great invention!"
