

## CASE STUDY

# Citibank

## ABOUT THE COMPANY

Citibank is the consumer division of financial services multinational Citigroup.

## THE CHALLENGE

ECL Group (who are a leading Australasian technical services company providing solutions for fuel systems, electronic security and facilities management) were engaged by their client Citibank to supply and install a suitable diesel tank system to supply fuel to a large generator in a multi-story building in downtown Auckland. This generator was located on the roof and thus compliance was key in providing a superior fuel storage solution to ensure continues power in times of need. ECL who have implemented many Fuelchief SuperVault tanks over the years contacted Fuelchief to proceed.

The Fuelchief SVR-499 feeds a generator on the roof of a multi-story building, ensuring businesses are guaranteed power supply in the event of a power cut.

## CASE STUDY

# Citibank

## THE SOLUTION

The tank design and fittings for the layout of the SuperVault custom tank, were designed by David our design engineer. These were perfected down the final millimeter to suit the particular site requirements required for ECL Group and Citibank. The signed GA and ensuring the tank was fabricated to spec meant that onsite installation would be as seamless and as efficient as possible. The final site for this tank was located on the roof of the building amongst other multi-story buildings, this required a crane to lift the tank to it's allocated position to then be connected and commissioned for service.

## THE RESULTS

This SuperVault Rectangular Series model SVR-499L fuel tank has now been installed and commissioned ready to supply fuel to the new generator backup system which is visible on the roof. This will ensure the businesses in the building have a guaranteed power supply source in the event of any power cuts, which is crucial to their operation.

## SUPERVAULT RECTANGULAR SERIES

- Capacity: 499L
- 4-hour Fire Rated
- Stores Many Liquids
- Can Be Customised
- SwRI 95-03 Approved
- Easily Transportable
- 30 Year Warranty
- Ideal For Diesel Generators
