Performance Indicators

BERA Dialogues

Number 2

Performance Indicators provide an important role in the world of education, sometimes

monitored by the educational system, and in many cases, they are used to evaluate the effectiveness of educational programs. Performance indicators are typically used to assess the outcomes of educational interventions, including student achievement and program outcomes. They can also be used to monitor the progress of educational initiatives and to make informed decisions about resource allocation and program improvements.

In the educational context, performance indicators are often used to measure the impact of educational interventions, such as the effectiveness of a new curriculum or teaching method. These indicators can help educators and policymakers understand which programs are successful and which ones need improvement. Performance indicators can be quantitative (e.g., test scores, graduation rates) or qualitative (e.g., student feedback, teacher evaluations). They can be used to evaluate the performance of individual students, classrooms, schools, or entire educational systems.

Performance indicators are important for several reasons. First, they provide a means of monitoring the progress of educational initiatives over time. Second, they can help educators and policymakers identify areas where improvements are needed. Third, they can be used to evaluate the effectiveness of educational interventions and to make informed decisions about resource allocation and program improvements. Finally, performance indicators can help ensure that educational programs are aligned with the goals and objectives of the educational system and that they are achieving the desired outcomes.

In conclusion, performance indicators play a crucial role in the world of education. They provide a means of monitoring the progress of educational initiatives, identifying areas for improvement, and ensuring that educational programs are aligned with the goals and objectives of the educational system. As such, performance indicators are an important tool for educators and policymakers as they work to improve the quality of education and ensure that all students are provided with the opportunities they need to succeed.
AS PART OF ITS SERIES OF OCCASIONAL PUBLICATIONS ON TOPICAL ISSUES, THE BRITISH EDUCATIONAL RESEARCH ASSOCIATION WILL BE OFFERING A SHORT AND READABLE BOOKLET ON PERFORMANCE INDICATORS.

SERIES EDITOR:
Pamela Lomax, Kingston Polytechnic

PUBLISHER:
Multi Lingual Matters, Bank House, 8a Hill, Clevedon, Avon, BS21 7HH

DATE OF PUBLICATION: MAY 1990

Hardback £15.00 ISBN 1-85359-093-2
Paperback £5.95 ISBN 1-85359-092-4

CONTENTS

Chapter 1  Introduction and Overview  C.T. Fitz-Gibbon [Editor]
Chapter 2  Great Performance Indicators of the Past  G.W. Hogg
Chapter 3  Working Documents of the Present
A. Public Examination Performance at 16+  P. Boulter
B. Performance Indicators  R. Gamble
C. Indicators for Schools  J. Livingstone
Chapter 4  Reactions from a CEO  C. Tipple
Chapter 5  Performance Indicators: The Search for the Holy Grail of Quality  B. Wilcox
Chapter 6  School Self Evaluation  P.S. Clift
Chapter 7  Performance Indicators and the Social Organisation of Evaluation: Some Proposals for Change  J. Gray
Chapter 8  Analysing Examination Results  C.T. Fitz-Gibbon
Chapter 9  The Need for Pupil Level Data  G. Woodhouse
Chapter 10  Attitudes as Performance Indicators  R.D. Hazelwood
Chapter 11  Information, Accountability and Educational Performance Indicators  D. Jesson and D. Maystone
Chapter 12  An Up-and-Running Indicator System  C.T. Fitz-Gibbon
Annotated Bibliography  P.B. Tymms
Notes on Contributors  C.T. Fitz-Gibbon
