

# Two Truths and a Lie

10 Minutes Total

## INSTRUCTIONS

- A participant takes a turn giving a toast, sharing three statements about themselves: two true statements and one false.
- The participant ends the toast when they are done speaking, and the room will take some time to discuss which fact is a lie. Split up into discussion groups of 5–6 if there are more than 10 participants total.
- All participants enter their best guess of which fact they believe to be a lie in the chat box.
- After one minute of guessing, the participant reveals in the chat box which fact was a lie.
- Repeat until every participant has had their turn to share two truths and a lie, or when activity time is up.
