RE: COVID-19 /Coronavirus Update #49

On November 10th, we informed residents that there was a resident who tested positive for COVID-19. Contact tracing was immediately conducted and all residents identified with possible exposure, *per CDC guidelines*, were informed, tested and self-isolated until their test results came back negative. For those of you concerned, **all residents tested have received a negative test result and are able to resume normal activity.**

It is important that everyone continue to strictly adhere to the protocols that we have in place. Continue to wear your masks when outside of your condo and in our common areas, continue to report any sickness or temperatures above 99.6, continue to monitor out-of-state travel and out-of-state visitors and continue to monitor in-state travel in those counties that have a positivity rate higher than 10%.

As always, let's work together to stay healthy.
