RE: COVID-19/Coronavirus Update #45

We are encouraged that the Sarasota County COVID-19 testing positivity rate continues to decline and ending on September 21st the 7-day average is around 3.5%. As of Monday, September 28th, Sarasota Memorial Hospital is reporting a positivity rate of 0.9% for the period from September 21st to September 27th. As you know, we have consistently exceeded local, state, and federal requirements relative to testing and protocols.

Due to the continued decline in the numbers, we are raising our capacity in the Dining Room to include the Veranda at Sarasota Bay Club and Hibiscus Room at Jacaranda Trace. We plan to start this new protocol on October 5th. Days of operation will remain Monday through Friday and all reservation processes will remain the same. We will seat as many residents as possible while maintaining our 6 foot "social distancing" protocol of tables.

All other protocols remain in place such as wearing your mask, screening at entry points, and all protocols related to visitors and use of common areas.

As always, please feel free to reach out should you have questions or concerns.
