Maintaining and Extending the Life of Military Aircraft

Wall Colmonoy Aerobraze specializes in the manufacture and overhaul of Fin & Plate and Tubular Type Heat Transfer Products for F-15 Stainless Steel / Inconel Heat Exchangers.

Wall Colmonoy Aerobraze’s brazing and manufacturing expertise has resulted in increased efficiencies and significant cost savings in maintaining and extending the life of critical F-15 operations for the US Air Force (USAF).

Having developed the first heat exchanger re-core procedures for the US Air Force (USAF), Wall Colmonoy has overhauled 2,400+ Heat Exchangers for the USAF. The overhaul process includes 100% replacement of all tubes, replacement of any non-serviceable manifold component parts, inspection and performance testing in accordance with USAF Technical Order. Original heat exchanger serial numbers are maintained for part traceability. Aerobraze achieves near 100% yield rate for both the F-15 primary and F-15 secondary heat exchangers on all parts inducted for overhaul.

Since 2013 Wall Colmonoy Aerobraze has manufactured more than 500 F-15 Fin & Plate Heat Exchangers for DLA (USAF) & Foreign Military Services (FMS).

F-15 Primary / Secondary Heat Exchangers
Overhaul / New Manufacture / Re-Core

Capabilities
Wall Colmonoy Aerobraze's process capabilities for heat transfer products include reverse engineering; in-house fin manufacturing; in-house metal stamping and forming; and in-house brazing and heat treating.

Heat transfer assemblies are manufactured and overhauled to meet stringent U.S. military requirements including operation under environmentally extreme conditions from -65 to 1650°F (-54 to 900°C). Corrosion durable assemblies resist cracking and failure over long-term use.

Repair, Overhaul / Re-core and Test
- New Manufacture
- Overhaul / Re-Core
- Core Manufacture
- Reverse Engineering

Building Cores is our Core
Capabilities include in-house manufacturing of all core details including fin material, high volume capacity for Inconel cores, and shelf stock inventory of ready-to-use replacement cores to support quick turnaround times for the Foreign Military Service Community. Overhaul / Re-Core pricing for FMS users available upon request.

- High volume capacity for Inconel Cores
- In-House manufacturing of all core details, including fin material
- Overhaul / Re-Core IAW T.O. 15A4-85-3 and USAF Approved Re-Core Process
- Pricing for FMS Users Available Upon Request

Pioneers and Today's Leading Experts
Wall Colmonoy developed the very first heat exchanger overhaul procedure for the US Air Force. Prior to that in the 1950s, Wall Colmonoy invented Nicrobraz® nickel-based brazing filler metal and pioneered high temperature furnace brazing. Even today, Nicrobraz® is used extensively in heat exchanger manufacture and overhaul.

Wall Colmonoy Aerobraze continues to develop its brazing and manufacturing expertise resulting in increased efficiencies, significant cost savings and performance improvements.
