Unleash Power Platform

Empower your Team to Innovate and Achieve More

The Problem

Many organizations are struggling with a growing demand for automated solutions and insights, but not enough developers to build them.

The Solution

Microsoft's Power Platform is the no-code/low-code platform that spans Office 365, Azure, Dynamics 365, and standalone applications. It provides the ability to build robust web and mobile apps and workflows fast and without limits.

This solution enables both non-developers and pro developers to create applications better and faster. With Power Platform, you are empowering your organization with the ability to create solutions that accelerate business.

Rolling Out Power Platform

It is important to roll out Power Platform correctly and utilize it in an organized and secure way with a formal plan. At Spyglass, we help you build this plan for a successful implementation of the Platform through our Envisioning and Solution Assessment.

Our Approach

Spyglass' Envisioning and Solution Assessment

- 2–4-week average timeframe

- Strategy and vision for the platform

- Customized center of excellence

- Defining roles & responsibilities

- End state delivery models

- Admin and governance policies

- Workshops with members of IT Infrastructure, Security, Business Users, and Project Sponsor Teams

- Final Execution Report with roll out plan

Power BI	Power Apps	Power Automate	Power Virtual Agents
Business analytics	Application development	Process automation	Intelligent virtual agents

Spyglass MTG Can Help!

Contact us today to discuss how we can help your organization successfully deploy Microsoft's Power Platform!

About Spyglass MTG

For over 15 years, we've closely partnered with Microsoft to bring their vast and expanding suite of enterprise solutions to our clients. We leverage proven methodologies, migration tools and expert consultants to architect, build, deploy, migrate to, and manage Microsoft solutions. Whether you are deploying or upgrading M365, implementing Azure, deploying Teams, building a SharePoint Site, developing a Security or Governance Model, designing a Modern Warehouse or BI Solution, or developing AI apps on the Power Platform, we can help!
