

Mergers & Acquisitions

Office 365 Tenant to Tenant Migrations

The Problem

Being involved in a merger or acquisition can be an exciting time as it often signifies growth and expansion. However, this also comes with the complexity of merging multiple IT environments. Key things to consider when migrating O365 tenants after a M&A can include, but are not limited to, complexity of content, legal and compliance ramifications, support desk, disparate systems, duplicate products for same function, time constraints, and more. Planning and communication is essential for successful and timely completions. This can be an overwhelming task for many organizations to handle on their own.

The Solution

Spyglass MTG's Tenant to Tenant solution, including our proven migration methodology, program assets, tools and accelerators, can help your organization achieve a successful and cost-effective IT integration of Microsoft platforms. Our approach includes a thorough review of your full Microsoft portfolio and migration plan including:

- Platform inventory
- Licensing requirements
- Language requirements
- Security, Governance and Regulatory needs and recommendations
- Tenant, Network and Infrastructure
- Identity and Authentication including MFA
- Desktop Management
- Mail Migration: Exchange and Public Folders
- Collaboration: Teams, SharePoint, OneDrive
- Reporting & BI
- Adoption and Change Management

We can help with all your Microsoft merger & acquisition needs from pre-planning, through implementation and ongoing support. It is important to recognize that growing pains can continue after the merger/acquisition has been completed too. New employees should be set up for success with ongoing training and consistent communication of expectations. By documenting goals, changes, and results, companies can ensure integrations and implementations are successful.

Spyglass MTG Can Help!
