## **iColor<sup>®</sup> 540/550 Optional Wi-Fi add-on card installation**

The iColor<sup>®</sup> 540/550 features wireless printing with the installation of the optional Wi-Fi add-on card. Please follow the instructions below to install and configure the card.

- 1) Turn off machine and Install card according to the diagram. Tighten thumb screws.
- 2) Turn on printer
- 3) Using the touch screen, navigate to User Tools > System Settings > Interface Settings.
- 4) Click Network > scroll down to the 4<sup>th</sup> page of this menu and click LAN type > Set to wireless LAN
- 5) Exit back to main menu
- 6) Using the touch screen, navigate back to User Tools > System Settings > Interface Settings > Wireless LAN
- 7) Set to: Infrastructure mode
- 8) Set security to whatever matches your router (WPA2 is the most popular setting)
- 9) Click Wireless LAN - Easy Setup
- 10) Ensure 'Push Button' is selected.
- 11) Go to your router and click the WPS button. Note that this is the only way to connect to your network – you cannot browse for the SSID. Let the button do the work for you.
- 12) Within 1 minute, go back to the printer and click 'Connect'.
- 13) Wait for confirmation to clear and the 'success' message displays.
- 14) You can check Wi-Fi signal under wireless LAN signal in the touchscreen menu.

## About UniNet

UniNet is a worldwide Original Equipment Manufacturer with over 25 years of experience in the imaging industry. With sales, service and distribution networks on every continent, we have earned a global reputation for high quality products and customer service. The UniNet iColor<sup>®</sup> Digital Color + White Transfer Media Printers feature full color plus white, combined with true black printing - a unique and low cost digital solution for the short to mid run market. With the most opaque white toner available, users can print on black, dark and clear media or garments in vibrant, colors + white. Imagine custom T-shirts, sweatshirts, hard surfaces, invitations, menus, stationary, promotional items, labels, banners, and more which include full color and brilliant white! Add our option specialty toner kits to produce fluorescent colors, security documents, clear watermarking and even dye sublimation prints, all in the same printer! What's more, our exclusive iColor<sup>®</sup> TransferRIP or ProRIP technology allows you print white as an overprint or underprint in one pass!
