Job Description

ZenQMS' product development team is looking for a Senior-level full-stack JavaScript (Node JS) Software Engineer to join our development team in our Ardmore (just outside of Philadelphia) headquarters. This individual will be tasked with designing, implementing, and maintaining new features as well as modifications to existing features. Primary responsibilities will also include participation in agile development processes.

We want someone who will understand the bigger picture architecturally, design and build scalable web applications, write efficient code, and create an amazing user experience.

In addition to Node JS work, there will also be opportunities to work in React JS, .NET, and AWS.

Requirements

- 8+ years experience as a software engineer
- 4+ years experience with Node JS, in particular
- Ability to scope, plan, and operate as a technical lead for projects
- An understanding of common frameworks, architectural concepts, and how they impact implementation and deployment infrastructure
- Demonstrable experience with relational databases, and a firm understanding of data modeling
- Experience working in a distributed, collaborative development environment
- Relevant degree, certification, or equivalent work experience

Experience in the following areas is a plus:
- React JS
- .NET
- HTML 5, CSS
- Entrepreneurial spirit and passion for elegant user interfaces
- Ability to thrive in fast-paced, collaborative development environment

About ZenQMS

At ZenQMS, we develop amazing quality management software for the whole enterprise. Our cloud-based platform, which includes modules for Document Management, Issue/CAPA, Training, Audits and Supplier Management, offers companies the opportunity to improve quality compliance and save money.

Our business is built on an established and well-respected client base, and growing rapidly. We've been able to cultivate an environment that is both collegial and entrepreneurial, but still retains a bit of early-stage fun. Our headquarters is located in Ardmore, PA, next to the train station.

Job Type: Full-time
