senseye

Ready

Senseye Ready

No sensors? No problem. Senseye Ready hardware for plug and play predictive maintenance.

Senseye Ready is our ecosystem of partner products that offer direct integration with Senseye's predictive maintenance software.

If you see the Senseye Ready logo you can be assured a partner's product has been tested and verified by Senseye to ensure compatibility and performance.

Senseye Ready hardware means that your predictive maintenance experience is plug and play and allows the very best hardware solutions for your requirements.

BENEFITS

● No limit to machine type / kind of industry

● Leading hardware from leading suppliers

● Data acquisition hardware proven to work with Senseye PdM

● Historians not required - Senseye Ready hardware can send data straight to Senseye's cloud platform

Get Ready. Get Connected

Condition monitoring data from machines is an essential ingredient to achieving success with Senseye. As a Senseye Ready partner, you can offer a complete solution for predictive maintenance combining your hardware with our software.

Updating sensors and edge devices or IoT gateways to become Senseye Ready is simple. You capture and process raw data at the edge, then send condition monitoring data to Senseye's cloud platform using our secure API.

Cloud-based service — senseye PdM — Sensor data API

Edge hardware / IoT gateway — senseye Ready

Sensors

More than just hardware. Simplified procurement

Buying a Senseye Ready product? You can be assured that the hardware is compatible with Senseye PdM and that we have tested it to make sure that the user experience is seamless.

As part of Senseye PdM Complete, Senseye can provide an end-to-end solution including hardware and software, simplifying your predictive maintenance project requirements significantly.

Frequently asked questions

How do I become a Senseye Ready partner?

Contact us to discuss your product capabilities and target markets. Next, Senseye will guide you through a simple verification process where you demonstrate your product's features and send data to our platform using an API.

What else do you expect from Senseye Ready partners?

In addition to the verification process, Senseye Ready partners will be expected to carry out some additional activities including:

• Issue a press release announcing you becoming a Senseye Ready partner

• Link to content on Senseye's website from relevant content on your website

• Use the Senseye Ready logo in your marketing material

• Provide product collateral for use by Senseye in marketing material

• Participate in joint marketing activity such as webinars

• Regular meeting to discuss opportunities and joint marketing
