

Model 523WB Wrap Station

FEATURES:

- Digital Speed Control
- Adjustable angle for taper on tubes
- Capable of running multiple size containers

OPTIONS:

- Hopper for auto-feed
- Low label/out of label alarms
- Programmable presets
- Custom guarding
- Additional conveyor length
- Custom configurations
- Clear label sensor

The 523WB is designed to label 0.5"-2.0" size cylindrical containers efficiently and with a small footprint. The system is heavy-duty, affordable, and compact in size. This machine can also be customized to run larger size containers. It can be used as a tabletop, or integrated into a production line.
