## PRODUCT FEATURES:

- Wide bandwidth covered in a single antenna
- Low VSWR, high gain over the band
- 1000 W feed power handling
- Passive construction
- Full-gain antenna, no lossy components used for matching

## PRODUCT APPLICATIONS:

- Wideband monitoring
- High-power applications

## PRODUCT DESCRIPTION:

This wideband high-power transmit antenna is designed for full-coverage high-power applications from 100 to 600 MHz. Housed in a rugged radome, the antenna is mounted either on a vehicle roof or an elevated groundplane.

The antenna element inside the radome has excellent gain and VSWR characteristics over the full-band. No lossy matching network is used, the antenna structure is designed to work over the full frequency range, giving maximum radiation and allowing high transmitted powers to be used.

The antenna can be used for reception at lower frequencies with reasonable gain.

This antenna can be customised if required, for different frequency ranges or greater power handling.
