

Embracing the Future of Work: Remote Work Capabilities

7-day Accelerated Workplace from Facebook Deployment

Remote work is quickly becoming one of the most desirable benefits an employer can offer—the freedom to work whenever and wherever is a great attractor and motivator, and leads to greater productivity, too! Employers are strongly encouraged to evaluate modern collaboration and communication tools that can keep those remote workers connected and engaged. Workplace from Facebook helps to make working from home much easier, and features like instant messaging, project groups, document sharing & co-authoring, and more all facilitate more fluid communication with colleagues, regardless of location. LineZero has prepared a 7-day rapidly-paced Workplace from Facebook implementation to assist organizations, like yours, to embrace the new future and ensure remote working capabilities are available to all who need them.

Deliverables & Activities
