

Product Selector...

contr**vision**[®]

Introduction

At Contra Vision we offer an unrivaled range of films for one-way vision applications.

Every window and every project is unique and that's why we have a range of films that perfectly suits every application. This Product Selector has been created to help you to select the most suitable film for your project.

- ✓ Widest choice of transparencies
- ✓ Long-term or short-term durability
- ✓ Inside or outside window application
- ✓ Solution for see-through graphics at night
- ✓ Exclusive *Performance HD* offers unbeatable high definition one-way vision graphics

Project Lifetime Value

Contra Vision products deliver real value across the entire project lifetime and can save customers up to 25% on overall project costs.

Create

Achieve your vision

The world's widest range of perforated window film, providing unlimited design options suitable for every application.

Print

Right first time

Spectacular results across a wide range of print technologies and Contra Vision® Grayliner™ ensures colors are right first time.

Install

Trouble-Free

The simplest installation process, suitable for both inside and outside situations in both high and low temperatures.

On window

Peace of mind

Outstanding adhesion technology you can rely on, ensuring great looking results for the entire duration of the project.

Remove

Quick and clean

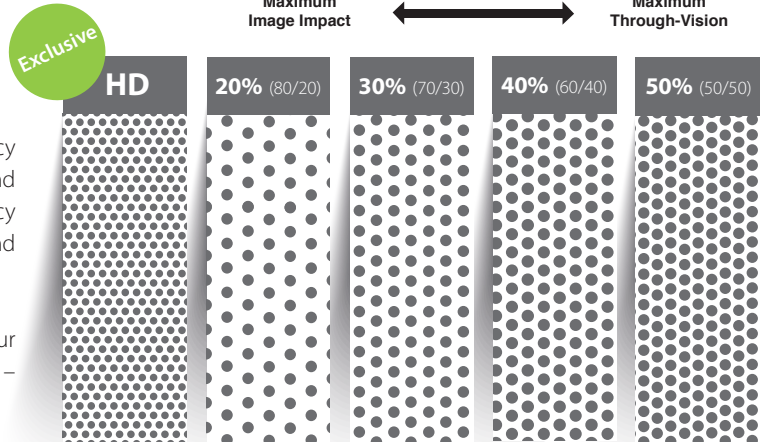

Excellent removal qualities mean minimal tearing, without the adhesive residue you can get from other films.

contraVision®

The right transparency for your project

A range of films from low transparency (20%, 80/20) for vibrant image impact and maximum privacy to high transparency (50%, 50/50) to maximize through-vision and daylight inside...

...and if it's both you're after, then our **Exclusive HD film** is the one for you – another world first from Contra Vision.

High Definition Perforated Window Film

Exclusively from Contra Vision

Performance HD features a groundbreaking micro perforation pattern with the world's smallest-ever perforations.

- ✓ Features 1mm holes - 60% smaller than standard perforated window film
- ✓ Micro-perforations allow for greater detail and finer text
- ✓ Noticeably improved see-through compared to standard 40% films
- ✓ Inside or outside window application
- ✓ Ideal for graphics featuring detailed product imagery

From beyond arm's length you'll question whether it's perforated at all! **See for yourself...**

Contra Vision® *Grayliner*™

Our unique patented Grayliner creates a realistic background to show how the printed image will really look on a window. It enables accurate color matching to the original artwork, reducing the tendency to overcompensate with increased color saturation, which can occur when using a standard white liner products. It is available in 2 versions:

Replacement Liner

Unrivalled printability and adhesion for solvent and latex printers.

Universal Liner

Suitable for all printing technologies, including UV inkjet.

contravision®

Our Ranges

To help you choose between *Performance* and *Campaign* products

Performance

Our Signature product range from the inventors of one-way vision graphics. A robust and durable product formulation with innovative features, reflecting over 35 years' experience and specialism in one-way vision graphics.

Durability: 3+ years

Campaign

A range of products retaining many high-quality features at very competitive prices, making it the market leader for short-term promotional campaigns.

Durability: Up to 2 years

† Our products are available in a number of widths and in short to jumbo roll lengths
