Investment objective

The Tabula European IG Performance Credit UCITS ETF (EUR) - Accumulating aims to track the iTraxx European IG Performance Credit Index (ITRXPRIG Index), less fees and expenses.

About the index

The ITRXPRIG Index provides exposure to European corporate IG credit. To emphasise credit risk and reduce direct interest rate risk, it takes exposure via a liquid credit default swap (CDS) index rather than individual corporate bonds:

- iTraxx Europe 5y (125 investment grade entities, equally weighted)

The index reflects the return from selling protection on the current series of the CDS index. It takes a total market exposure of 400% to iTraxx Europe index. The index is rebalanced monthly.

Prior to 21 April 2021 the Tabula European IG Performance Credit UCITS ETF was named the Tabula European Performance Credit UCITS ETF and tracked the iTraxx European Performance Credit Index, a benchmark with 240% IG and 60% HY exposure.

Investment process

The Fund aims to directly replicate the index composition via CDS index positions and cash collateral (typically investment grade European sovereign bonds with maturity <12 months). To minimise counterparty risk, CDS index trades are executed through regulated brokers and centrally cleared.

Performance

	Dec 16 - Dec 17	Dec 17 - Dec 18	Dec 18 - Dec 19	Dec 19 - Dec 20	Dec 20 - Dec 21
Share class:	n/a	n/a	11.9%	11%	3.7%

Key risks

- **No capital protection:** The value may go down as well as up and you may not get back the amount invested.
- **Market risk:** The fund is primarily exposed to credit risk. Returns will suffer if there is a default, or higher perceived risk of default, among the entities referenced by the CDS indices, or a write-down ("bail in") of an entity's debt by financial authorities. The fund may also be impacted by other factors affecting the value of debt securities issued by those entities, including changes in interest rates and exchange rates. When selling CDS on subordinate debt, such debt may be subordinate to senior debt.
- **Leverage:** The fund uses leverage, so losses may be magnified.
- **Liquidity risk:** If there are insufficient buyers or sellers of CDS indices, the fund may not be able to match index exposure exactly and the fund may not be able to buy or sell investments readily. Neither the index provider nor the Issuer make any representation or forecast on the Liquidity of CDS transactions.
- **Counterparty risk:** The fund may incur losses if an institution providing services or acting as a derivative counterparty becomes insolvent.
- **Credit risk:** The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Important information

This document is issued by Tabula Investment Management Limited ("Tabula"), on behalf of Tabula ICAV, an umbrella Irish collective asset-management vehicle incorporated in Ireland, authorised and regulated by the Financial Conduct Authority ("FCA"). Tabula is a private limited company registered in England and Wales (Registered no. 11286661). Registered address: 10 Norwich Street, London EC4A 1BD.
