

LookThink cognoSIS

Student Success Hub

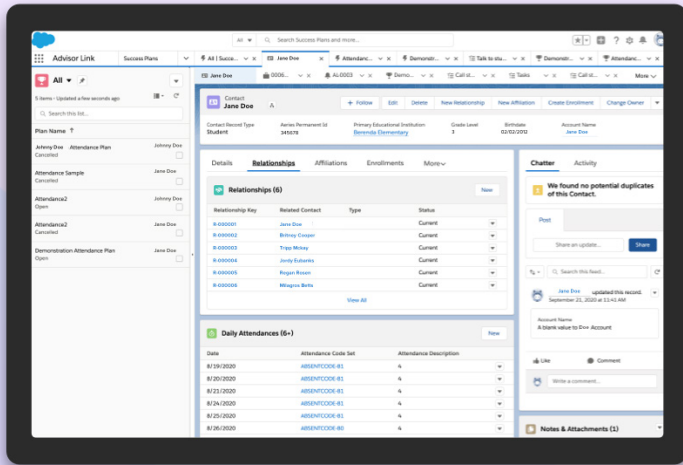

Student Success Hub

LookThink CognoSIS helps you gain insights that matter from all the data that impacts a student's success. We bring proactive expertise to every engagement, new ideas to streamline processes, improve outcomes, and provide support.

Student Success Hub Provides

- A holistic view of students' success across extended periods of time, unrestricted by class or year
- Success plans relating to behavior, grades, and attendance alerts to teachers, parents, and administrators
- Advising pools and actively track student success against pre-defined goals

360° Student View

Created by Salesforce Education Cloud specialists, LookThink CognoSIS provides a 360° view of your school and students to gain unique insights and improve student outcomes.

Uniquely customized for your school, LookThink CognoSIS helps maximize your Salesforce investment with critical Education Accelerators like Registration & Operations, Admissions & Enrollment, Grades, Attendance, and Transcripts & Report Cards.

LookThink CognoSIS provides Salesforce Education Accelerators to US and Global K-12 and Higher Ed organizations. We increase time-to-student insights and help improve outcomes.

Your School, Your Way

We help maximize your Salesforce Education investment through intuitive and powerful experiences customized for your specific school or system.

Focused on Flexibility

Create configurable dashboards which provide relevant student information and insights across the entire student lifecycle.

Streamlined User Experience

Use the platform right from the very start to reduce time, effort and costs. Enable more efficient processes and easily create your own reports.

Proactive Engagement

Our experts collaborate with you to develop new ideas, streamline processes, improve outcomes and structure support to suit your needs.

Madera Unified School District

Madera Unified School District (MUSD) serves 20,000 students and has over 2,000 employees in California. LookThink worked with MUSD to create a centralized, unified structure that showed data from multiple systems and could generate reports/conclusions in one place.. The system provides a full 360 view of the student that encompassed data from academics, attendance, behavior, and family/household dynamics. LookThink created a data integration between Salesforce and Aeries (Madera's previous student information system), implemented Salesforce Student Success Hub for Case Management, and is creating a Fonteva-based Parent Engagement Center.

100% reduction in time spent generating report cards

30,000+

30,000+ Students supported to-date

10+ Years of Salesforce Education Experience

Let's talk about how LookThink CognoSIS can help you revolutionize your school admin and operations with Salesforce!
