ND A Company You Can Rely On

Since 1955, ND Industries has been providing top quality fastening and assembly related products and services to a wide variety of industries including automotive, electronics, aerospace, appliance, and many more. ND's commitment to improvement has led to a continuous investment in the best equipment, facilities, and people to serve you.

Vibra-TITE the bottled product division of ND Industries

Vibra-Tite is one of the world's market leaders in anaerobics, cyanoacrylates, epoxies and ultraviolet technologies. Vibra-Tite is quickly becoming one of the most highly respected names in the adhesive industry. And, as a result of ND's low overhead expenses and in-house capabilities, Vibra-Tite products offer the same high quality and superior performance of other name brand products at a cost saving of **up to 40%.**

A Single-Source Supplier

ND is a vertically integrated company and has achieved a unique position in today's market place with a wide range of products designed to seal, cushion, insulate, temporarily retain, and control noise and vibration. ND's high quality line of products, customer driven solutions and on-time-delivery is the reason why more companies are turning to ND as their single-source supplier.

A Global Presence

ND owns and operates numerous facilities in North America. ND's latest state of the art expansion includes facilities in Taiwan and China with licensees located throughout the world. No matter where they are located, each ND facility is a fully supported member of the ND family dedicated to providing innovative, affordable fastening and assembly related products and services.

Vibra-TITE®

THREADLOCKERS

- Locks and seals threaded fasteners
- Prevents loosening from shock and vibration
- Performs better than mechanical lockers
- Alleviates rust-lock
- Prevents leakage

To decrease set-up time, use Excel Primer N (Vibra-Tite 611) or Excel Primer T (Vibra-Tite 612) with all anaerobic threadlockers. See Vibra-Tite primer listing on page 22.

Vibra-TITE®

Threadlockers

**1.8 mL Resealable
Bullet Tubes**
**15-25 Applications
in each Tube!**

Vibra-Tite 111 Low Strength Threadlocker that eliminates vibrational loosening and seals against leakage and corrosion. Ideal for use on assemblies requiring periodic adjustment. Typical uses include soft metal fasteners, precision screws, and locking fasteners smaller than 1/4" (6 mm) in diameter. **COMPETES WITH LOCTITE® 222™**

Vibra-Tite 121 Medium, Removable Strength Threadlocker that seals nuts and bolts allowing disassembly using standard tools. Typical uses include locking nuts or bolts from 1/4" to 3/4" (6-20 mm) in diameter. **COMPETES WITH LOCTITE® 242®**

Vibra-Tite 122 Medium Strength Threadlocker with greater oil tolerance. Typical uses include locking nuts or bolts ranging from 1/4" to 3/4" (6-20 mm) in diameter. **COMPETES WITH LOCTITE® 243™**

Vibra-Tite 123 Medium Strength Hi-Temp Oil Tolerant Threadlocker. Typical uses include locking nuts or bolts ranging from 1/4" to 3/4" (6-20 mm) in diameter at continuous temperatures up to 450°F. **COMPETES WITH LOCTITE® 246™**

Vibra-Tite 131 High Strength Threadlocker for maximum security suitable for most applications where disassembly is not required. Designed to withstand extreme environmental conditions and chemical exposure. Ideal for the prevention of rust and corrosion. Typical uses include permanently locking nuts or bolts up to 1" in diameter. Heat and hand tools are needed for disassembly. **COMPETES WITH LOCTITE® 262™**

Vibra-Tite 132 High Strength Threadlocker For permanently locking or sealing nuts and bolts up to 1" diameter. Primerless formula will cure even on passive materials such as stainless steel. **COMPETES WITH LOCTITE® 263™**

Vibra-Tite 137 High Strength Threadlocker for maximum security that withstands temperatures to 450° F. Typical uses include bolts up to 1 1/2" in diameter. Heat and hand tools are needed for disassembly. **COMPETES WITH LOCTITE® 272™**

Vibra-Tite 140 High Strength Threadlocker for maximum security. Suitable for most applications where disassembly is not required. Typical uses include permanently locking nuts or bolts up to 1" (25 mm) in diameter. Heat and hand tools are needed for disassembly. **COMPETES WITH LOCTITE® 271™**

Vibra-Tite 146 High Strength Threadlocker for permanently locking nuts or bolts up to 1 1/2" in diameter. Heat and hand tools are needed for disassembly. **COMPETES WITH LOCTITE® 277™**

Vibra-Tite 150 Wicking Grade, Medium Strength Threadlocker designed specifically for use on pre-assembled connections. Seals small gaps through capillary action. Typical uses include pre-assembled fasteners up to 1/2" in diameter and porous die castings. Protects welds from rust and corrosion. Hand tools are needed for disassembly. **COMPETES WITH LOCTITE® 290™**

Vibra-Tite 325 Plastic Threadlocker is designed to be a low strength, fast curing material for small metal or plastic fasteners. Vibra-Tite 325 fixtures within 2 minutes and fully cures within 24 hrs. **COMPETES WITH LOCTITE® 425™**

Vibra-Tite Threadlockers lock and seal threaded fasteners. Liquid threadlockers are considered to be the most effective method of locking threaded fasteners because they utilize the entire assembly. They perform better than traditional mechanical devices such as lock washers preventing any loosening from shock and vibration.

Low Strength

For soft metal fasteners. Locks fasteners smaller than 1/4" in diameter.

Medium Strength

Locks nuts and bolts larger than 1/4" in diameter.

High Strength

Permanently locks nuts and bolts larger than 1/4" in diameter.

Wicking Grade

Pre-assembled fasteners and porous die castings.

Vibra-TITE®

Vibra-Tite® VC-3® Threadmate is a powerful locking and sealing coating for threaded fasteners that works on the principle of “friction through viscosity”. Vibra-Tite VC-3 Threadmate utilizes a special blend of acrylic resins to prevent fasteners from loosening even under the stress of prolonged and extreme shock and vibration. Vibra-Tite VC-3 also works to resist leakage at fastening points by acting as a dam between mated threads.

Available sizes:

- #21302 | 1 mL Pillow Pack
- #21305 | 5 mL Tube
- #21330 | 30 cc Bottle w/Brush
- #21325 | 250 cc Can

One Tough Application!

- Stops fasteners from loosening from extreme shock and vibration
- Works with metal, wood, pp and ppe plastics and more
- Fasteners are easily adjusted, removed and reused
- Works on fasteners of any shape or size, from tiny eyeglass screws to large construction bolts
- Works with internal or external threads

This product is approved by TACOM*
for use on the U.S. Army's main battle tank!

Vibra-TITE® THREADLOCKERS

Vibra-Tite® VC-3® Threadmate Specifications

Container size (manual application)	1 mL, 1oz. (30 cc), 8 oz. (250 cc), or larger containers
Color	Red (custom colors can be manufactured dependent on quantity)
Solvent	Methyl ethyl ketone. Also available in Ethyl Acetate, Methyl Propyl Ketone & Dimethyl Carbonate
Cured form	Resilient plastic
Shelf life	Indefinite (under ideal storage conditions)
Chemical resistance	Offers resistance to most solvents (acts as a partial corrosion barrier)
Dries to touch	In several minutes
Dries for use	10-30 minutes. For critical applications 24 hrs is recommended.
Drying method for bulk production	Best achieved using considerable airflow in addition to temperature not exceeding 130°F
Operational temperature range	-65°F to +165°F (-54°C to +74°C) For other temperature applications, please consult factory
Reusable	5 or more times
Engagement torque	Moderate
Breakaway	No distinct break; slow, fluid release as material cold flows
Standard coating length	1 to 1 1/2 times diameter
Lead thread requirement	None
Thread fill requirement	30 – 50% of the thread root area

Note: See MSDS for Safety & Material Handling Instructions

Vibra-TITE®

THREAD SEALANTS

- Seals and secures metal pipes and fittings
- Fills the space between threaded metal parts
- Prevents leakage caused by tape shredding, vibration loosening, solvent evaporation, or damaged threads
- Prevents corrosion and galling of threads
- Low and high pressure applications
- Seals to burst strength of most piping systems
- Facilitates assembly
- Service removable

Vibra-TITE®

Thread Sealants

Vibra-Tite 420 PTFE Instant Pipe Sealant - Industrial Grade with controlled lubricity, prevents galling while protecting from corrosion and rust. Parts may be repositioned up to 24 hours after assembly. Typical uses include stainless steel and all other metal fittings. **COMPETES WITH LOCTITE® 565™/592™**

Vibra-Tite 427 Medium Strength - Stainless Steel Pipe Sealant with high viscosity, locks and seals threaded fittings with high performance withstanding temperatures up to 300°F (149°C). Suitable for stainless steel. **COMPETES WITH LOCTITE® 577™**

Vibra-Tite 440 Hydraulic & Pneumatic High Pressure Sealant with excellent solvent resistance. It locks hydraulic and pneumatic connections producing a high strength, high pressure seal, while allowing easy disassembly with standard tools. Typical uses include pneumatic fittings, small pipe threads, and hydraulic fittings up to 2" in diameter. **COMPETES WITH LOCTITE® 545™**

Vibra-Tite 442 Hydraulic Fast Cure Sealant is a fast curing gel thread sealant which withstands temperatures up to 300°F (149°C). **COMPETES WITH LOCTITE® 5452™**

Vibra-Tite 444 Hydraulic High Pressure Sealant is a general purpose pipe sealant that creates an instant seal on threaded joints with a high resistance to solvents and withstands temperatures to 300°F (149°C). Typical uses: Small pipe threads and hydraulic fittings. **COMPETES WITH LOCTITE® 569™**

Vibra-Tite 446 High Pressure Sealant - Refrigerant Sealant provides excellent resistance to solvents on threaded pipes and fittings up to 3" in diameter. Typical uses include refrigeration systems and service with volatile chemicals. **COMPETES WITH LOCTITE® 554™**

Vibra-Tite 460 High Temperature - Stainless Steel Pipe Sealant prevents galling and provides an instant low pressure seal on coarse fitting threads which is further strengthened as the product cures. Assembled parts can withstand temperatures up to 400°F (204°C) and may be repositioned up to 24 hours after assembly. Typical uses include stainless steel, aluminum, galvanized metal and other inert metal threaded pipe fittings. **COMPETES WITH LOCTITE® 567™**

Vibra-Tite 480 Multi-Purpose - FBC Compatible Thread Sealant with PTFE is designed to lubricate and seal threaded connections. A non-curing and non-toxic formula, Vibra-Tite 480 contains no lead or harmful metals and can be used in potable water systems.

Vibra-Tite 486 Multi-Purpose Thread Sealant with PTFE is a creamy white paste for general purpose pipe and thread sealing. Typical applications include sealing threaded pipes, pipe fittings and flanges to seal against liquids and gases.

Benefits:

- Lubricates during assembly
- Seals regardless of assembly torque
- Seals to the burst rating of the pipe
- Provides controlled disassembly torque
- Easy dispensing
- Good chemical and temperature resistance, 300°F (150°C)
- Instant seal
- Seals and secures metal fittings

Typical Applications:

- Fire protection industry
- Chemical processing industry
- Petroleum refining industry
- Waste treatment facilities
- Utilities and power generation
- Gas compression and distribution
- Automotive and industrial equipment

Vibra-Tite Thread Sealants

seal and secure metal pipes and fittings, by filling the space between threaded metal parts. Thread sealants prevent leakage caused by tape shredding, vibration loosening, solvent evaporation, and damaged threads. Vibra-Tite products are designed for both low and high pressure applications. Thread sealants seal to the burst strength of most piping systems. Because of the lubricating properties, Vibra-Tite thread sealants make it easy to assemble fittings as well as prevent galling of the threads. For repairs, parts may be disassembled with basic hand tools.

Vibra-TITE® THREAD SEALANTS

Vibra-TITE® RETAINING COMPOUNDS

- Increases the shear strength on non-threaded cylindrical metal assemblies
- Fills voids between close-fitting metal assemblies
- Creates a solid one-piece assembly
- Seals joints against leakage
- Prevents corrosion
- UV / Blacklight indicator

Vibra-TITE®

Retaining Compounds

Vibra-Tite 530 General Purpose Retaining Compound bonds metal assemblies. A low viscosity retaining compound recommended for diametral gap distances up to 0.005" to augment press fits. Withstands temperatures of up to 300° F providing a shear strength of 3,000 psi after 24 hours with a fixture time of 10 minutes. Typical uses: Rotors, shafts, bushings, bearings, and pulleys. **COMPETES WITH LOCTITE® 609™/675™**

Vibra-Tite 538 High Strength Retaining Compound provides maximum strength for use where high dynamic force or cyclic loading is anticipated. **COMPETES WITH LOCTITE® 638™**

Vibra-Tite 541 High Strength Retaining Compound cures in room temperatures filling diametral gaps up to 0.015". Typical uses include fitted cylindrical parts replacing set screws, clamp rings, and snap rings. It provides a shear strength greater than 3,000 psi after 24 hours with a fixture time of 10 minutes. **COMPETES WITH LOCTITE® 680™**

Vibra-Tite 542 High Strength Retaining Compound is a high viscosity retaining compound that allows parts to be adjusted during assembly. It provides a shear strength greater than 4,000 psi. Typical uses include slip fit components, rotors, shafts, impellers, and splines. **COMPETES WITH LOCTITE® 635™**

Vibra-Tite 546 Substantial Impact Resistance flexible for high shock/impact performance from hub to rotor.

Vibra-Tite 548 Press Fit / Rapid Cure works with continuous operating temperatures up to 350°F. Provides a shear strength greater than 3,500 psi. **COMPETES WITH LOCTITE® 648™**

Vibra-Tite 550 Core Plug Sealant is designed to be used on freeze, core, and cup plug applications. A thixotropic formula, it lends itself well to vertical dispensing. **COMPETES WITH LOCTITE® 540™**

Vibra-Tite 560 High Temperature Retaining Compound is a high temperature (400°F / 204°C), high strength adhesive for retention of cylindrical components, where disassembly is not required on press-fit assemblies. It provides a shear strength greater than 3,000 psi. Typical uses: Rotors, shafts, bushings, bearings, and pulleys with temperatures up to 400°F. **COMPETES WITH LOCTITE® 640™**

Vibra-Tite 566 Gap Filling Compound is designed for use on worn cylindrical parts where tolerances are poor. **COMPETES WITH LOCTITE® 660™**

Vibra-Tite 567 High Temperature Retaining Compound locks metal cylindrical assemblies with diametral clearances up to 0.015". Provides a shear strength greater than 3,500 psi on steel sealing against leakage while preventing corrosion. Typical uses: Rotors, shafts, bushings, bearings, and pulleys. **COMPETES WITH LOCTITE® 620™**

Benefits:

- Reduce machining costs
- Press/Shrink fits can be replaced with slip fits
- No expensive finishes required
- Increase mechanical strength of the assembly
- 100% surface contact
- Retains and seals, eliminates corrosion and seizure
- Restore fit to worn or out-of-tolerance assemblies
- Eliminate part replacement
- Part distortion is eliminated

Typical Applications:

- Mount bearings in housings or shafts
- Mount motors, gears, sprockets and pulleys on shafts
- Retain cylindrical linings
- Replace keys and set screws
- Augment slip fits
- Lock keyways
- Secure splines, bushings, bearings, oil seals, water pumps core plugs and more

Vibra-Tite Anaerobic Retaining Compounds are designed to increase shear strength on non-threaded, cylindrical metal assemblies. The liquid anaerobic material fills voids between close-fitting metal assemblies. It cures to a toughened thermoset-plastic which creates a solid one piece assembly. Retaining compounds seal joints against leakage and prevent corrosion. These materials have gained wide acceptance as a standard method for assembling press-fit and slip-fitted parts.

Vibra-TITE® RETAINING COMPOUNDS

Vibra-TITE® ANAEROBIC GASKETING

Benefits:

- Remains liquid when exposed to air
- Cures when confined between mating flanges
- Can fill gaps as large as 0.050
- Alleviates the need for preformed gaskets

Typical Applications:

Can be used as a form-in-place gasket:

- Thermostats
- Pumps
- Gearboxes
- Compressors
- Transmission housings
- Axle covers

RTV SILICONE GASKET MAKERS

Designed for use in mechanical assemblies, RTV Silicones create a “formed-in-place” gasket with excellent resistance to temperature, moisture, vibration, and weathering. RTV Silicones can eliminate the need for costly cut gaskets.

- Adhesion to many substrates
- Withstands extreme temp. cycling
- Excellent chemical resistance
- One-part formulation
- Room temperature cure
- Extremely flexible

Vibra-TITE®

ANTI-SEIZE COMPOUNDS

Anti-Seize lubricants are specially formulated to prevent seizing, galling, pitting, excessive wear, and corrosion. It will not wash, squeeze or burn out, even at elevated temperatures and pressure.

Benefits:

- Eases assembly and disassembly
- Reduces friction and wear
- Protects assemblies from corrosion
- Withstands high temperatures and pressures

Typical Applications:

- Gears, Chains, Cables, Sprockets, Fastener Threads

Includes Brush-Cap Applicator

Vibra-TITE® GASKETING & LUBRICATING

Vibra-TITE[®] CYANOACRYLATES

are single-part clear adhesives that rapidly polymerize at room temperature and develop strength extremely fast (fixture 0 to 60 seconds). They are initiated by moisture on the parts surface or by accelerators.

Vibra-TITE CYANOACRYLATES

Cyanoacrylates, commonly known as Super Glues, are highly useful in virtually every industry. Some of the higher volume applications include printed circuit board wires and a broad range of medical devices.

OEM applications include small and large appliances, automotive applications, toys, and cosmetic packaging.

MRO applications include repair of plastic, rubber and metal parts.

Everyday consumers are a large volume users of Super Glues for use and repair on everything from crafts to broken toys and household gadgets.

Factors that Effect CA Performance

- Low humidity = slower cure speed
- Low viscosity for small gaps
- Difficult-to-bond surfaces: PTFE, Silicone, Polyethylene, Polypropylene
- Excess adhesive - Less is best

Vibra-TITE®

Light Cure Adhesives

Vibra-Tite light cure adhesives are single-part, photo-initiated acrylates that cure on demand when exposed to UV-light.

- Almost instant cure
- Some cure with very low intensity
- Flexible or rigid products available
- High optical clarity & non-yellowing
- Bonds a wide range of substrates

METHACRYLATE ADHESIVES

Vibra-Tite acrylic (methacrylate) adhesives are a room temperature curing, non-sagging, 2-part system comprised of resin and activator. Our adhesives respond well to dissimilar materials and a wide range of temperatures.

- Forms a bond on:
- aluminum
 - ABS
 - wood
 - fiberglass
 - stainless steel
 - PVC
 - ceramic
 - steel
 - composite
 - plastic
 - glass

Custom sizes are available upon request, including 200 mL, 250 mL, 380 mL coaxial, and u-TAH™ universal cartridges, as well as 10 gallon kits, and 40 gallon drum packs. No weighing or manual mixing is needed. Gel and fixture times are measured at 77° F. Colored products and special order products may require a minimum order. See Safety Data Sheet and Technical Data Sheet for more information.

STRUCTURAL ACRYLIC ADHESIVES

are a Methacrylate technology, room temperature curing, non-sagging, 2-part, no-mix system comprised of resin and hardener. It forms structural bonds on metal, composite, plastic, wood, ceramic and many other substrates. They are ideal for parts where extended open time is needed.

Spatter build-up inside nozzles and tips restricts inert gas flow causing porous welds. In addition, frequent cleaning or disposal of consumables leads to downtime and higher running costs.

Thermal Defender™ coatings provide protection against spatter build-up allowing the inert gas to flow freely; greatly reducing maintenance and increasing productivity.

TWO PRODUCTS - Choose the one that best meets your needs.

USER-APPLIED TD-97

TD-97 is a dry film ceramic coating which is sprayed onto parts to protect them from metal weld spatter. Quick and easy, it can be applied and dried in under a minute and is then ready for immediate use.

TD-97 is a versatile product intended for use in a wide range of welding environments. With a low cost per application, TD-97 can be economically applied to practically any surface which could be damaged by weld spatter.

Item: 97095 | NET WT. 9.5 OZ. (269 g)
Competes with Loctite® SF 7900™

TD-97 KEY BENEFITS:

- Easy application
- Fast drying
- Low cost per use
- Savings on welding consumables
- Higher quality welds
- Reduced downtime
- Easy cleanup
- Reduced need for cleaning chemicals

TD-97 APPLICATIONS:

- MIG and MAG welding
- Laser and Plasma cutting
- Jigs, Fixtures, Nozzles, Tips, Cabling
- Work Pieces & Shrouds
- Cables & Sensors

User-applied TD-97 provides instant weld nozzle and tip protection against spatter. However, if you're looking for a longer lasting, higher performance material for weld nozzles and tips, our pre-applied Spatter-Nix® may be a better alternative.

PRE-APPLIED SPATTER-NIX®

SPATTER-NIX is a nozzle and tip coating designed to be the most durable, and effective solution for weld spatter prevention on the market. Spatter-nix is adhered to parts beforehand and can be stored until necessary for use.

In particular welding environments, Spatter-Nix will greatly out perform sprays or dips. A pre-applied product, Spatter-Nix is bonded to the parts and will repel spatter for longer durations and is much more durable.

SPATTER-NIX KEY BENEFITS:

- Pre-Applied and ready for use
- Reduces nozzle cleaning frequency
- Faster and easier nozzle cleaning
- Increase lifespan of weld nozzles
- Reduces the need for anti-spatter dips and sprays

SPATTER-NIX IS IDEAL FOR:

- Thin metal applications (0.7 - 1.0 mm)
- A Pillars, B Pillars, C Pillars
- Automotive Stamping
- Body Shop Work
- Spot Welding
- Stitch Type Welding

TESTIMONIALS:

- A Major Metal Fabricator reduced nozzle cleaning from every five cycles to every 500 cycles.
- An Automotive OEM cut down their robotic weld nozzle cleaning from three times per shift to once every six shifts.
- A Tier 1 automotive supplier watched its nozzle maintenance go down from every four cycles to once every 184 cycles.
- A Muffler Manufacturer minimized its nozzle cleaning from every 15 minutes to once every six hours.

VIZ-TORQUE™

TAMPER DETECTION MARKER

VISUALLY IDENTIFIES LOOSE FASTENERS

Viz-Torque is an inspection paste applied across completed fittings, assemblies, nuts, bolts and studs to show whether a part has been moved from its original position.

Easy to use

Simply apply a single bead of Viz-Torque material across the assembled fasteners and allow to dry. No need to prepare surfaces.

Fast Identification

A bright, highly visible colored paste which will fluoresce under black light, making it easy to detect without requiring testing.

Dries Quick

Skins over in 20 seconds, dries in 20 minutes and is fully cured in 24 hours. Dry time can be reduced by increasing air flow.

FEATURES

- ✓ Exhibits good adhesion to most metals when applied to a clean, dry surface.
- ✓ Helps quality control by providing warranty management in the event of tampering.
- ✓ Does not easily wash off with water or mild solvents.
- ✓ Compatible with most metals, paints and plastics.

COLORS

1 oz. (30 mL) tube of Viz-Torque is available in a variety of colors to meet your visual identification needs.

Vibra-TITE®

MICROBOND™

First adhesive washer of its kind!
Super light weight and dry to the touch!

Microbond Dri-Adhesive Washers are made from a fibrous material which holds ND Industries' powerful Microspheres adhesive technology.

Microspheres, a material formed through a process known as microencapsulation, consists of tiny spheres or microcaps containing either an activator or adhesive. Although mixed together, the shell of each sphere keeps both parts separated allowing the material to stay dry and inactive until during assembly the force of engagement breaks open the microcaps causing activation.

- Dry to the touch and safe to handle
- Works great on sheet metal applications
- Provides vibration dampening
- Prevents loosening due to vibration
- Prevents galvanic corrosion
- Great alternative to split-ring, serrated and conical washers
- Adhesive activates upon installation
- Will not scratch surfaces
- Significantly reduces weight in assemblies
- Custom shapes, sizes and colors available

Vibra-TITE[®] PROVIDES A VARIETY OF SERVICES

Chemical Toll Blending

ND Industries, parent company of Vibra-Tite, annually manufactures over one million pounds of a wide variety of adhesives, anaerobics, epoxies, ultraviolets, acrylics, and more. ND Industries offers chemical toll blending services to our customers. Provide us with your formula and we'll blend, package, and prepare your product for shipment.

Laboratory Testing

ND Industries has a certified facility that can be utilized to perform testing and analysis on your products. ND Technologies Group holds testing accreditation through the American Association for Laboratory Accreditation (A2LA) in accordance with ISO/IEC standard 17025. This accreditation demonstrates ND's technical competence in performing a variety of tests on threaded fasteners, adhesives, sealants, coatings, and mastics for the automotive, aerospace, and electronic industries.

TO MEET YOUR CUSTOMIZED NEEDS

Bottling and Packaging Services

ND Industries manufactures many adhesives and sealants for private label use and can fill, label, and package bottled products to your specifications. ND Industries can also supply bulk materials. We provide private labeling services including label design and production with minimum quantity requirements substantially lower than our competitors.

Custom Formulations

ND's Development Lab can create custom adhesive and sealant formulations based on your requirements. Depending on testing requirements, material can be subjected to any number of experiments. In the Analytical Lab, ND will conduct evaluations as your product advances through development to the prototype stage. Whether using differential scanning calorimetry to determine the glass transition temperature of a polymer, Fourier transform infrared spectroscopy to examine material composition, or a cone and plate viscometer to identify threadlocker viscosity rates, ND's chemists will thoroughly evaluate the properties of your customized material.

PreApplied

ND's service centers can Pre-Apply ND products on ND-supplied or customer supplied fasteners. The service centers are tooled with state-of-the-art fastener processing equipment to provide quality products and rapid distribution.

ONE OF THE INDUSTRY'S BROADEST PRODUCT LINES

ND offers a wide range of fastening and assembly related products and processes that exhibit one or more of the following characteristics:

In order to assist customers in understanding ND's current product line, the products have been categorized by their function: Inert Locking, Reactive Locking, Advanced Sealing, Masking and Lubricating, and Assemble EZ. In addition to the products listed here, ND offers customized formulations for your unique fastening and assembly needs.

CUSTOMERS SERVED

With its growing family of fastening and assembly products and services, ND meets or exceeds many of the rigorous standards established by the automotive, aerospace, and defense industries.

Customers:

- CHRYSLER
- GENERAL MOTORS
- FORD MOTOR COMPANY
- BOEING
- LOCKHEED MARTIN
- JOHN DEERE
- MACK TRUCK
- CUMMINS ENGINE
- VOLKSWAGEN
- GENERAL ELECTRIC

INERT LOCKING

ND STRIP®, ND PELL-IT®, SURE TEMP, ND PELL-IT® SOFT TOUCH TIP

ND inserts are offered in Nylon, KEL-F® or VESPEL® which ND Industries automatically inserts into a fastener, making it self-locking and self-sealing, yet fully adjustable.

ND PATCH® & ND PATCH® 360° RING

ND patch products make threaded fasteners self-locking and self-sealing, while leaving them fully adjustable. Compare to Tuf-Lok®

Vibra-Tite® VC-3®

Vibra-Tite VC-3 is not an anaerobic or an adhesive. It is a unique blend of acrylic resins that make any threaded fastener self-locking and self-sealing, while remaining service removable.

REACTIVE LOCKING

EPOXY-LOCK®

Epoxy-Lock is a powerful locking / sealing, adhesive which is pre-applied to either male or female threaded fasteners. Though the adhesive surface is dry to the touch, the forces of engagement initiate a chemical reaction.

ND MICROSPHERES®

ND Microspheres are offered in acrylic and epoxy formulations, available in pre-applied or bulk for application by other fastener coater / converters. Compare to 3M™ Scotch-grip™, LOCTITE® Dri-Loc®, & omniTECHNIK Precoat®.

EXPAND-A-LOCK™

Expand-A-Lock is an original 2-in-1 application and the most effective way to simultaneously lock and bond fasteners and seal against all air and fluid leakage.

ADVANCED SEALING

ST-3®

ST-3 is designed to be applied by ND or on the customer's automated band coating equipment or tumble coater. Compare to 3M™ Scotch-Grip™ 4291, and LOCTITE® Vibra-Seal® 516, 517, 503, and 503H.

ND PLASTISOL

ND Plastisol provides a positive seal that eliminates leaks. It is available in a wide variety of durometers and colors.

ND PLASTISOL OPENMOLD

ND Plastisol Open-Mold are parts made of moldable PVC materials that can seal, trim, cushion, insulate and control noise and vibration... often at a fraction of the cost of die cutting and injection molding.

ND MASTICS & EXPANDABLES

Crushable mastics evenly fill and seal all voids and are applied by the assembler. Heat causes the material in Expandables to expand and adhere to metal, creating a seal while filling in the gaps.

SEALTEK™ 1120

A medium viscosity, cure in place gasket. This system forms a resilient, soft and flexible gasket that can conform to almost any dimensional surface. Cures rapidly with heat or UV radiation.

MASKING & LUBRICATING

ANTI-SEIZE 917 COMPOUND

ND's 917 Anti-Seize compound is a high temperature lubricant formulated with Nickel to prevent seizing, galling, pitting and excessive wear and corrosion. Ideal where different metals come in contact. It will not wash or squeeze out.

ND LM-1293®

An automotive approved process, ND LM-1293 is a PTFE-type fastener coating that lubricates and prevents undesirable substances from adhering to fastener threads. Compare to Nycote®.

EZ Drive 300™

An ergonomic assembly aid designed to increase installation efficiency by reducing friction by as much as 75%

ASSEMBLE EZ

STAY-PUT®

Stay-Put provides temporary, yet dependable retention for fasteners or other components prior to and during the assembly process.

ND COLOR CODE

Whether your need is to identify some special characteristics or to color match a fastener head to a mating surface, ND is your source for color identification.
