

# edison365 businesscase

A unique platform to justify the value of ideas

edison365businesscase provides a transparent and repeatable method of capturing business case data that ensures standardization and accountability across fully configurable processes and case types. Built on Microsoft 365, the intuitive interface gives you the organization-wide visibility needed to understand the financial and resourcing requirements of successful business transformation, as well as its potential benefits.

edison365businesscase is part of the edison365 suite, enabling organizations to make ideas pay; from the drawing board onto the balance sheet.

#### Accelerate approval

Spot trends, identify bottlenecks and easily solve problems to avoid costly and inefficient delays.

#### Complete visibility

Understand the cost, benefit, resource requirements and ROI across the entire portfolio of business cases.

#### Fully configurable

Build multiple templates, forms and approval stages aligned to your own processes and financial sign off limits.

#### Built for Microsoft Office 365

Engaging user interface and a familiar set of tools ensures immediate adoption and positive user experience.

# Standardize, understand and accelerate your business case processes

**edison365businesscase** enables rapid justification for business transformation

## Portfolio reporting

Report cost, benefit and resource requirements across one or more business cases to understand potential impact on live and future work.

## Optimized business case approval

Set target time-scales for each approval stage. Easily assign reviewers and discover where (and with whom) a case has stalled.

## Drag-and-drop business case templates

Build the perfect template for the size or type of case required and configure stages to align with your internal processes.

## Clear data visualization

Configure standard tables to present large amounts of information efficiently. Users can switch between multiple visualizations to allow effective engagement with data.

## Personalized access

Variable views are available depending on individual permissions and approval rights. The personal page keeps track of what needs approving, by when and where issues lie.

## Full version control

Entire audit trail visible via stored case history, supporting internal compliance requirements.

## Comprehensive device and end user access

Use multiple devices to access information; Windows, iOS, and Android. Different users can use different devices and different browsers to suit their personal ways of working.

## Zero training

The intuitive UI ensures instant solution adoption. Leverage your existing Microsoft investments to enable more effective collaboration and efficient ways of working.

## Making ideas pay: from the drawing board onto the balance sheet

edison365 is the #1 end-to-end innovation and delivery platform built for Microsoft 365. Enable your ideas economy with this suite of products and gain a transparent view of all your portfolios, easily crowdsource solutions, justify their implementation and identify areas of focus to generate measurable results to make ideas pay.
