# Everything you need in one solution

edison365projects delivers on your project requirements:

## Agile and Waterfall support

Manage your projects with both Waterfall and Agile technique. Support for Agile is included, with drag and drop task boards.

## Detailed management reporting

Completely transform your reporting, using pre-prepared templates for a range of standard reports such as a status or highlight report at both project and programme level. Use the existing standards, customize them or create your own.

## Finance management

Manage all project financials in one location including budget, forecast and actuals as well as income, benefits and ROI. Easily integrate costs with your finance system.

## Enhanced task and risk visibility

With a Personal Tab, individuals have a highly intuitive board view of all their personal activities including tasks, risks and actions across every project. Users can easily update any item by simply dragging and dropping.

## Seamless planning

Prioritize, schedule and assign tasks quickly and accurately with a familiar UI. Anticipate dependencies and easily reschedule tasks with an unlimited number of Gantt charts.

## Comprehensive device and user access

Use multiple devices to access information; Windows, IOS, and Android. Users can use different devices and different browsers to suit their personal ways of working.

## In-built collaboration

Template designs for projects and programmes provide extensive built in collaboration features. Use Yammer and Teams to discuss each project through the easy to use UI.

## Standards and templates

You can tailor edison365projects to fit your needs with custom standards and templates. Pre-define data and tasks to support major project life-cycles, enabling governance and standardization.

## A single source of portfolio, project and resource data

edison365projects is changing the way organizations manage their projects and resources, providing them with the technology and management to drive success.

The tool is suitable for departmental plans through to large sophisticated projects, supporting all project needs in one system.

Optimize resources across your portfolio

Take control of cost and benefit realization

Make more informed decisions

Get real-time information at your fingertips

Experience complete clarity on portfolio performance

Enable more effective collaboration
