

A Healthy Project Pipeline

The Challenge

Project intake and initiation was haphazard. There was no standard way to request a project and many great ideas never surfaced. A consistent method and system were needed to address these issues.

The Results

Guthrie partnered with Innovative-e, a leading MS Gold PPM partner.

Using Innovative-e's three-step approach; Foundation, Process Enablement, and Success Management, Guthrie realized quick wins and long-term benefits.

Projects are now staffed with appropriate resource levels. The tools are easy to use, so employees are able to use them with minimal training and on-boarding.

Company:
Guthrie Clinic

Industry:
Healthcare

Location:
Pennsylvania, United States

The Guthrie Clinic is a physician-led not-for-profit integrated health system serving NY & PA, with 5,000 employees, 1.2 million outpatient encounters in 25 communities and 4 hospitals.

The Guthrie Clinic is dedicated to life-long health and well-being for each person in the community. Guthrie's long history of innovation has focused on medicine holistically with multi-specialty groups for over 100 years.

"We had a pretty good foundation in place for project management and we were looking to take it to the next level. Microsoft Project Online got us there and now, with edison365ideas, businesscase, and projects added on, I'm in love!"

Gail Strausser, Application Manage, Guthrie Clinic
