# Splitit Helps Family Take Care of their Puppy's Kennel Cough

Tenecia, a 911 dispatcher for the past 7 years, moved into her dream home in Connecticut a couple of years ago with the love of her life and their 3 year old. Her family is her everything and they recently added a furry, little, four-legged friend to the mix. As a new pet owner, Tenecia looked around for pet insurance, but it was very confusing. Due to COVID-19, and because the unknown is a scary thing, their family has been on a stricter budget.

One word to describe Splitit:

# Simple

Unfortunately, when their little beagle, Jordan, was five months old he got kennel cough. To help cover this unexpected cost, Tenecia's veterinarian introduced her to VitusPay<sup>SM</sup>, powered by Splitit®, an installment payment option provided to pet owners as a way to make pet care more affordable. [VitusPay, powered by Splitit, allowed Teneica to take care of her puppy without having to dip into her savings.](#) As a result, Tenecia would happily pay with Splitit again in the future for any large purchases.

“Splitit was so simple to use and we would definitely recommend their payment option to all our friends and family.”
